

Experience Dynamic Entertainment.

ViewSonic's innovative ViewLED™ TVs bring sensational HD entertainment to any room.

Experience breathtaking color with ultra black contrast for super crisp images with ViewLED technology. Ultra thin design with sizes to fit perfectly in any room. The 42" VT4200LED and 23" VT2300LED feature Full HD 1080p panel resolution, delivering the ultimate visual experience for HD movies and Internet content. In addition, the VT4200LED delivers 120Hz operation, fast 4ms response time and a 100,000:1 dynamic contrast ratio. The 18.5" VT1900LED and 32" VT3200LED are both 720p, ENERGY STAR® 5.0 compliant and offer a 5ms response time.

Whatever the source of video content, Internet streamed entertainment, movies, TV shows, gaming or computer applications, these ViewSonic models feature extreme versatility, offering multiple digital and analog inputs for easy connections to all your entertainment products.

These mercury-free LED TVs feature industry leading picture quality for more natural skin tones, vibrant colors, more pure whites and excellent detail. The result is a high definition visual experience that is true to life.

Connecting to the digital world has never been this exciting.
