

Video Walls Simplified for Any Space

ViewSonic® All-in-One
Direct View LED Displays

The Rise of All-in-One Direct View LED Technology

All-in-One Direct View LED (dvLED) displays are transforming the way businesses deploy large-scale digital signage. By combining pre-assembled, pre-calibrated panels into a single, streamlined solution, this technology simplifies installation and significantly reduces total cost of ownership—making high-impact visual communication more accessible than ever.

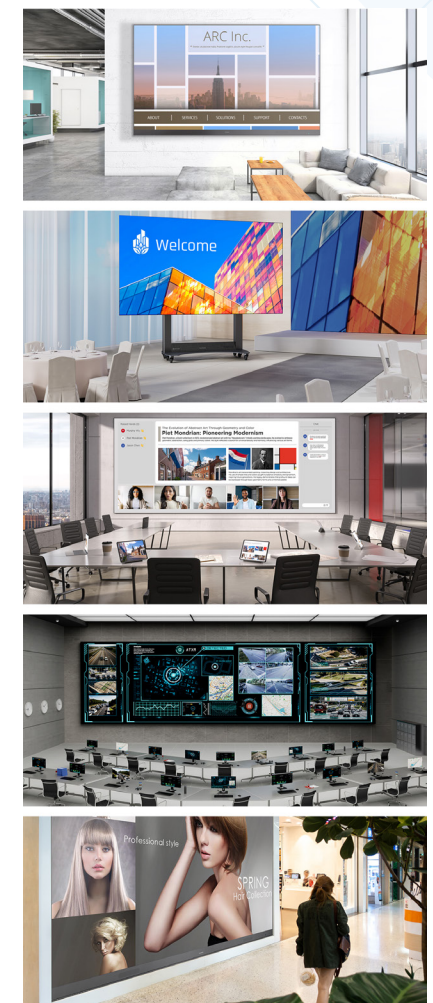

As demand grows for immersive, dynamic displays in conference rooms, lobbies, command centers, and retail environments, All-in-One technology is at the forefront of this shift. ViewSonic is leading the way with a full line of All-in-One Direct View LED solutions—offering both pre-configured and fully configurable options that are easy to install, simple to maintain, and designed to deliver bold, unforgettable messaging wherever it's needed most.

Versatile Applications Across Modern Spaces

Equipped with affordable pricing and easy installation, All-in-One Direct View LED displays are transforming how organizations communicate, engage, and operate. By eliminating the complexity of traditional modular LED setups, this streamlined technology opens the door for more resellers and integrators to adopt and deploy high-impact visual solutions. The result is unmatched clarity, flexibility, and performance in environments where bold, reliable communication is essential.

- Corporate Lobbies & Reception Areas:** Create unforgettable first impressions with immersive branding and dynamic content that elevate any entrance.
- Event Spaces & Auditoriums:** Modular designs provide flexibility and visual punch for large-scale presentations and performances.
- Conference Rooms and Boardrooms:** Clear, vibrant visuals enhance presentations, video calls, and collaboration—even in well-lit spaces.
- Control Rooms:** Ideal for mission-critical environments, these displays offer 24/7 reliability and real-time data visualization.
- Retail & Hospitality:** Add eye-catching energy to customer experiences, with transparent display options that seamlessly integrate into glass surfaces.

These scenarios show how Direct View LED technology is redefining enterprise communication—bringing messages to life with clarity and scale.

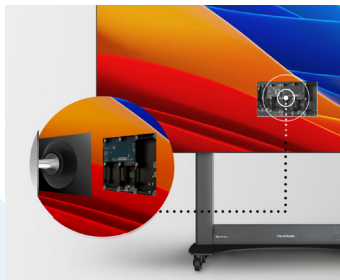

Displays Designed for Every Business

From high-traffic lobbies to control rooms that demand 24/7 performance, the applications for Direct View LED are as diverse as the industries using them.

No matter which ViewSonic® Direct View LED series you choose, you'll benefit from the same core strengths that set our solutions apart—versatility, visual excellence, easy management, and world-class support. Designed to deliver impactful performance in virtually any environment, every display in our lineup is built with features that make installation, usage, and maintenance easier than ever. Explore some of the shared advantages that come standard across our entire portfolio:

- **Flexible Sizing:** Fixed 16:9 screens up to 231" and configurable solutions allow for unique aspect ratios and resolutions.
- **Durable Designs:** All ViewSonic Direct View LED displays feature surface treatment technology with IP- and IK-rated LED modules for enhanced protection against impact, dust, and moisture – making them ideal for public spaces.
- **Front Serviceable:** Enjoy easy maintenance thanks to LED modules that are accessible from the front of the display.
- **Brilliant Visuals:** These displays deliver jaw-dropping, lifelike color and stunning images thanks to a 3,840Hz refresh rate, 600 nits brightness, and up to 10,000:1 contrast ratio.
- **Simple Wireless Casting Options:** Enjoy wireless screen casting with flexible options that work. For a dedicated hardware solution, the ViewShare™ WPD-900 wireless presentation system delivers easy plug-and-play casting with no software installation required. For a software-based approach, AirSync enables secure wireless sharing over your network.
- **Expert Support Included:** Supervised installation, certified technicians, and a 3-year limited warranty ensure peace of mind.

Unfold New Possibilities. Anywhere.

Mobile All-in-One dvLED Displays

Need flexibility on the move? The LDS series of foldable, mobile displays brings Direct View LED technology to any space with ease. They feature foldable designs, GOB surface protection, and a motorized screen that lifts higher than any other dvLED in its class. It's perfect for dynamic presentations and portable digital signage in corporate and educational settings. Simply roll it in, unfold, and power on.

- Easy Setup:**
 Experience effortless setup in just minutes — no wall mounting or complex installation needed. Simply unfold, plug into a standard 20-amp outlet, and you're ready to impress with vibrant visuals anywhere.
- Mobile and Foldable:**
 This display effortlessly glides between classrooms, event spaces, and meeting rooms with smooth, 360-degree silent wheels. Its innovative foldable design enables the display to fit into large passenger elevators, while an included flight case provides secure protection during transport between venues.
- Durable and Reliable:**
 A commercial-grade motorized stand and patent-pending hinge design provide enhanced stability, even with heavy usage. Glue-on-Board (GOB) technology offers incredible surface protection with IP54-rated dust and moisture resistance and IK06 impact resistance.
- Integrated Control Bar:**
 A user-friendly control bar is built into the floor stand, maximizing the screen area and keeping the display front clean and uncluttered.

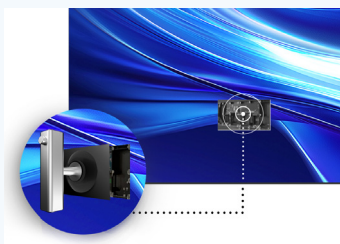

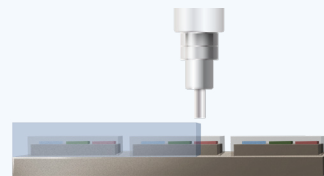

Big Impact. Bigger Value.

Simplified All-in-One dvLED Displays

Experience big-screen impact without the big hassle or big price tag. The ViewSonic LDE Series of Direct View LED (dvLED) displays is pre-configured, affordable, and easy to set up. With everything built in, installation is simple, operation is smooth, and maintenance is minimal.

- **Immersive Screen Size:**
Choose from 108", 136" and 163" options.
- **Innovative All-in-One Design:**
Power, controls, and image stitching built directly into the cabinets for a clean, seamless look.
- **Simplified OS:**
Plug-and-play setup lets clients go from power-on to brilliant content in seconds.
- **Built to Last:**
Glue-on-Board (GOB) protection with IP54 and IK06 ratings shields LEDs from bumps, dust, and moisture.
- **Easy Maintenance:**
Hot-swappable front modules and included suction tool make LED replacement quick. Calibrated spare tiles are included to minimize downtime.
- **Integrated Management:**
Q-SYS Library Verified and compatible with Crestron, Extron, and AMX.
- **ADA Compliant:**
These displays feature a slim profile with less than 4 inches, of depth and adhere to ADA compliance standards.
- **Unmatched ViewSonic Support:**
Our Field Solutions team offers consultation from design to installation. Plus, count on us for US-based inventory and support.

Advanced Features. Seamless Design.

Feature-Rich All-in-One dvLED Displays

Step up to the LDM Series when you need flexibility and smart functionality without relying on extra hardware. It's the ideal choice for teams who value built-in collaboration, easy network management, and PBP (Picture-by-Picture) support. Plus, it's perfect if aesthetics are a top priority since it features a detachable control bar that can be hidden for a clean, bezel-free look.

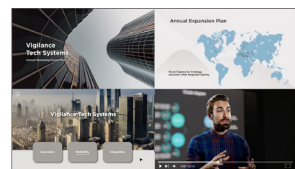

- **Immersive Screen Sizes:**
Choose from 136", 163", and 231" options.

- **Flexible, Hassle-Free Installation:**
The system control bar is mounted to the bottom of the display for standard installation. Optional accessory kits are available for hidden or separate installations. A modular, user-friendly design ensures quick and easy setup.

Without Control Bar With Control Bar

- **Durable Design:**
Options with Glue-on-Board (GOB) or Chip-on-Board (COB) technologies deliver exceptional durability. With IP54 ratings and up to IK08 impact resistance, these displays withstand daily wear, ensuring superior protection against bumps, dust, and moisture for any application.

4K Performance. Pure Simplicity. Premium All-in-One dvLED Displays

The LDP Performance series of Direct View LED displays brings bold 4K visuals to life with all-in-one simplicity and advanced Chip-On-Board technology. Built for impact in boardrooms, lobbies, and auditoriums, these sleek displays deliver brilliant color, immersive sound, and effortless setup. From powerful performance to premium design, the LDP series makes it easy to go big without the complexity.

- **Immersive Screen Sizes:**

Choose from 136", 163", and 217" options.

- **Stunning 4K Resolution:**

With a sleek frameless design and 4K UHD resolution, these displays deliver vibrant, immersive imagery that captivates from every angle. Featuring 10,000:1 contrast ratio, 600 nits of brightness, a wide 120% Rec.709 color gamut, and a smooth 3,840 Hz refresh rate, visuals stay sharp and impactful even in bright, high-traffic environments.

- **Chip-On-Board Technology:**

Chip-on-Board (COB) technology delivers tighter pixel pitches for exceptional detail without compromising reliability or durability. With IP54 rated dust and moisture protection and IK08 impact resistance, it withstands demanding environments. Perfect for high detail applications, COB ensures stunning image fidelity and ultra-high resolution.

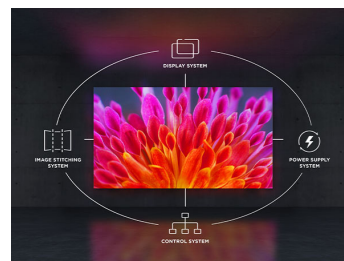

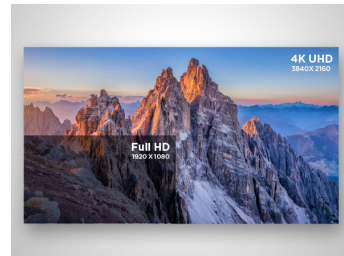

- **All-in-One Integration:**

ViewSonic Direct View LED displays serve as a simplified solution with an integrated LED display, image stitching, power supply, and embedded control systems. This all-in-one design eliminates the need for a complicated setup process – all you need to do is turn on the display.

- **Flexible Installation with System Control Bar:**

A detachable system control bar can be mounted up to 30 feet away, giving you greater flexibility when installing the display in hard-to-reach or discreet locations. Once the control bar is detached, the display achieves an impressive 99% screen-to-body ratio, allowing the display to blend effortlessly into any space or décor.

*Accessory kit for separate installations sold separately.

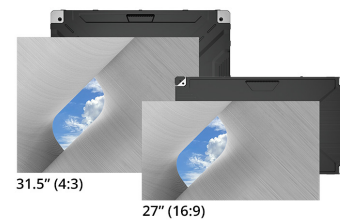

Custom Configurations Made Easy

Configurable All-in-One dvLED Displays

The LDC series breaks free from traditional 16:9 constraints, allowing you to design the perfect video wall for your specific needs. Regardless of the shape, size and configuration of your video wall, rest assured that it will deliver amazingly vibrant and stunning images in 1080p, 4K and non-standard resolutions.

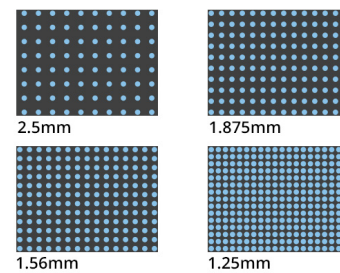

- **Flexible Cabinet Size:**

The LDC series lets you design a Direct View LED video wall perfectly tailored to your space. Every Direct View LED video wall is comprised of multiple LED tiles within an LED cabinet. Depending on your desired screen size and aspect ratio, the quantity of LED cabinets will vary.

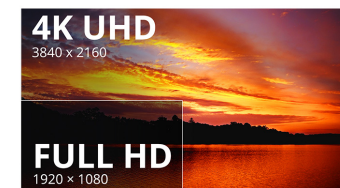

- **Pixel Pitch:**

Choose from four distinct LDC Direct View options – 1.2, 1.5, 1.8, and 2.5 pixel pitch – to design a video wall that delivers the optimal viewing experience for your space and audience. These pixel pitch variations cater to a range of viewing distances, ensuring stunning visuals no matter where viewers stand.

- **Resolutions:**

Regardless of the shape, size and configuration of your video wall, rest assured that it will deliver amazingly vibrant and stunning images in 1080p, 4K and non-standard resolutions.

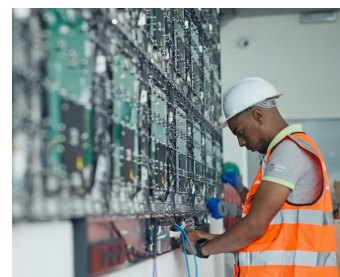

- **Tough and Reliable Glue-on-Board (GOB) Technology:**

GOB surface treatment with IP54 and IK06 ratings protects against dust, moisture, and impact. of the LED module surface ensures resistance to dust, and moisture, making it perfect for busy public spaces.

- **Trusted Partnership from Design to Post-Installation:**

An experienced ViewSonic Field Solutions Architect will guide you through every step—design, site prep, product and spec recommendations, and installation prep—at no extra cost. We'll also verify site readiness and provide on-site supervision during installation.

More Than a Display —A Trusted Partner

At ViewSonic, we're committed to more than just delivering cutting-edge display technology—we're here to ensure your success every step of the way. Our U.S.-based support and field solution teams bring deep technical expertise and a hands-on approach to every deployment, from planning to post-installation. Whether you're working with our certified partners or internal teams, you'll have access to responsive service and knowledgeable professionals who understand your business needs.

When you choose ViewSonic, you're choosing:

- **Proven Expertise:** Nearly four decades of innovation in visual solutions
- **Reliable U.S.-Based Support:** Real people. Real help. When and where you need it
- **Field Solution Engineers:** On-site guidance and technical support for smooth deployment
- **Customer-Centric Focus:** A long-term partner invested in your success

Because the right technology partner makes all the difference.
