Out-of-the-Box Video Wall On Wheels

Mobile and Foldable
Direct View LED Displays

Big-Screen Messaging in Any Location

Deliver dynamic visuals anywhere with a fully portable video wall. Traditional video walls are complex and confined to fixed locations. The ViewSonic® LDS Series of Direct View LED mobile displays revolutionizes this with a patent-pending hinge design, foldable large screen, mobile cart, and included flight case for easy transport and setup. Ideal for high-end venues, it delivers stunning visuals with minimal hassle.

Pain Points of Traditional Large Format Displays

- 
Complicated Setup
 Multiple power cords, system control boxes, and external speakers require meticulous configuration and often demand higher-amp power outlets. This can lead to costly and time-consuming electrical work, adding to the deployment complexity. This is especially inconvenient and expensive for short-term events needing rapid, cost-effective deployment.
- 
Complex Operation and Management
 Complex interfaces and missing software demand specialized technicians, adding unplanned cost and operational overhead.
- 
Difficult and Expensive to Transport
 Large screen sizes are costly to ship, and because traditional large-format displays are installed in a fixed place, they cannot be moved from room to room or venue to venue.

Direct View LED Mobile Display: Ready-to-Use AV Solution

- 
Effortless setup in just minutes
- 
Patent-pending hinge design for durable folding and unfolding
- 
360° wheels and included flight case for easy transport
- 
Durable Glue-on-Board (GOB) surface treatment
- 
Front-serviceable LED modules for streamlined maintenance
- 
Sleek frameless screen with multiple inputs
- 
AV control system integration

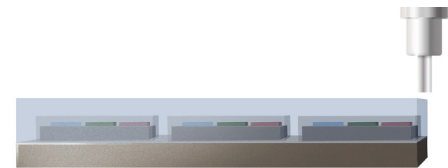

Easy Setup for Big Impact

- Pre-assembled for effortless setup in just minutes
- No wall mounting or complex installation needed
- Simply unfold, plug into a standard 20-amp outlet

Mobile Solution with a Foldable Screen

- 360-degree silent wheels for easy movement from location to location
- Innovative foldable design allows the display to fit into large passenger elevators
- Included flight case provides secure protection during transport between venues
- Motorized height-adjustable stand
- Seamless PC integration through OPS and dedicated PC slot

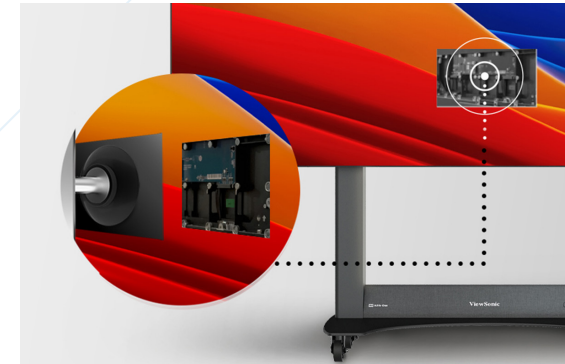

Durable and Reliable Design

- Commercial-grade motorized stand
- Patent-pending hinge design for enhanced stability, even with heavy usage
- Glue-on-Board (GOB) surface treatment offers robust protection
- IP54 rating for dust and moisture resistance
- IK06 rating for impact resistance

Integrated Control Bar

- User-friendly control bar is built into the floor stand, maximizing the screen area
- Common I/O ports are accessible at the rear of the control bar for easier accessibility and connectivity

Front Serviceable

- LED modules are accessible from the front of the display, enabling easy maintenance
- Included vacuum maintenance tool uses suction to remove and replace LED modules

Brilliant and Bright Visuals

- Sleek frameless design and Full HD resolution
- 600 nits of brightness
- Wide 120% Rec.709 color gamut
- Smooth 3,840 Hz refresh rate

Content from Multiple Sources on a Single Screen

An intuitive split-screen function makes video conferences and online collaborations more flexible and creative. The display also supports Picture-by-Picture (from up to 4 different inputs) or Picture-in-Picture (a screen within another screen) scenarios in real-time.*

*Both scenarios only work with HDMI source input.

Seamless Mini PC Integration

- The display features a dedicated PC slot and connectivity ports
- Thoughtful design ensures a secure, streamlined setup and easy connectivity
- Clean, professional installation appearance

Powerful Audio Performance

- Sloped dual 30W speakers direct sound more effectively towards the listener's ears
- Enhanced audio clarity and power for a more immersive and dynamic auditory experience
- Rich, impactful sound for every presentation

Wireless Content Sharing

- Pre-installed vCast software streams content wirelessly from mobile devices to the display, one-to-one or many-to-one
- Optional WPD-900 wireless screen casting kit offers secure plug-and-play support for Miracast and iOS/macOS mirroring
- Enjoy 1080p, DRM-protected streaming, and a USB-C pass-through charging port—no extra software or network setup required

Usage Scenarios

Despite its immense screen size, the display and cart can be easily folded and stored in the included flight case, enabling the entire kit to be easily shipped and moved from location to location for different events and exhibitions.

Lobbies

Auditoriums

Museums

Boardrooms

Hospitality / Events
