**For nearly four decades, ViewSonic has been a trusted leader in professional display solutions.**

Delivering more than just technology, we provide complete hardware, software, and service ecosystems designed to help our partners succeed. Our U.S.-based experts offer personalized support and guidance every step of the way, ensuring seamless integration and long-term reliability.

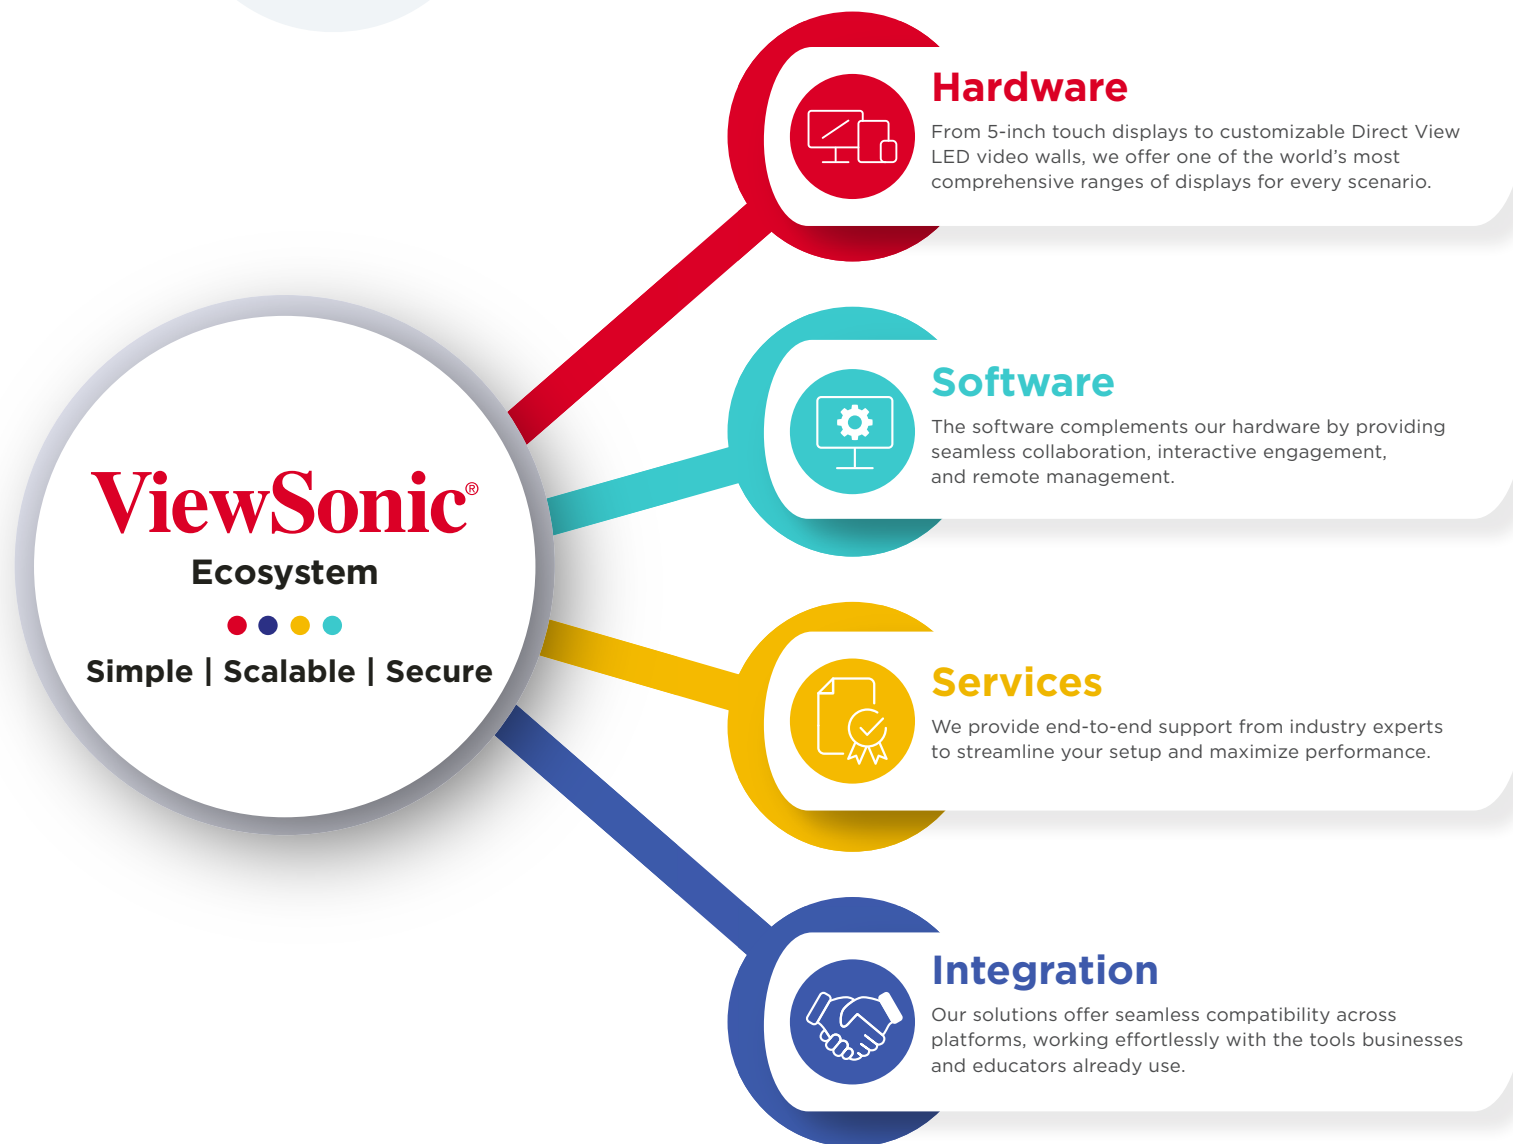

Driven by innovation and a deep understanding of our customers' needs, we empower businesses, schools, and organizations worldwide to connect, collaborate, and grow with confidence.

ViewSonic is more than a brand.  
It is a partnership built on trust  
and shared success.

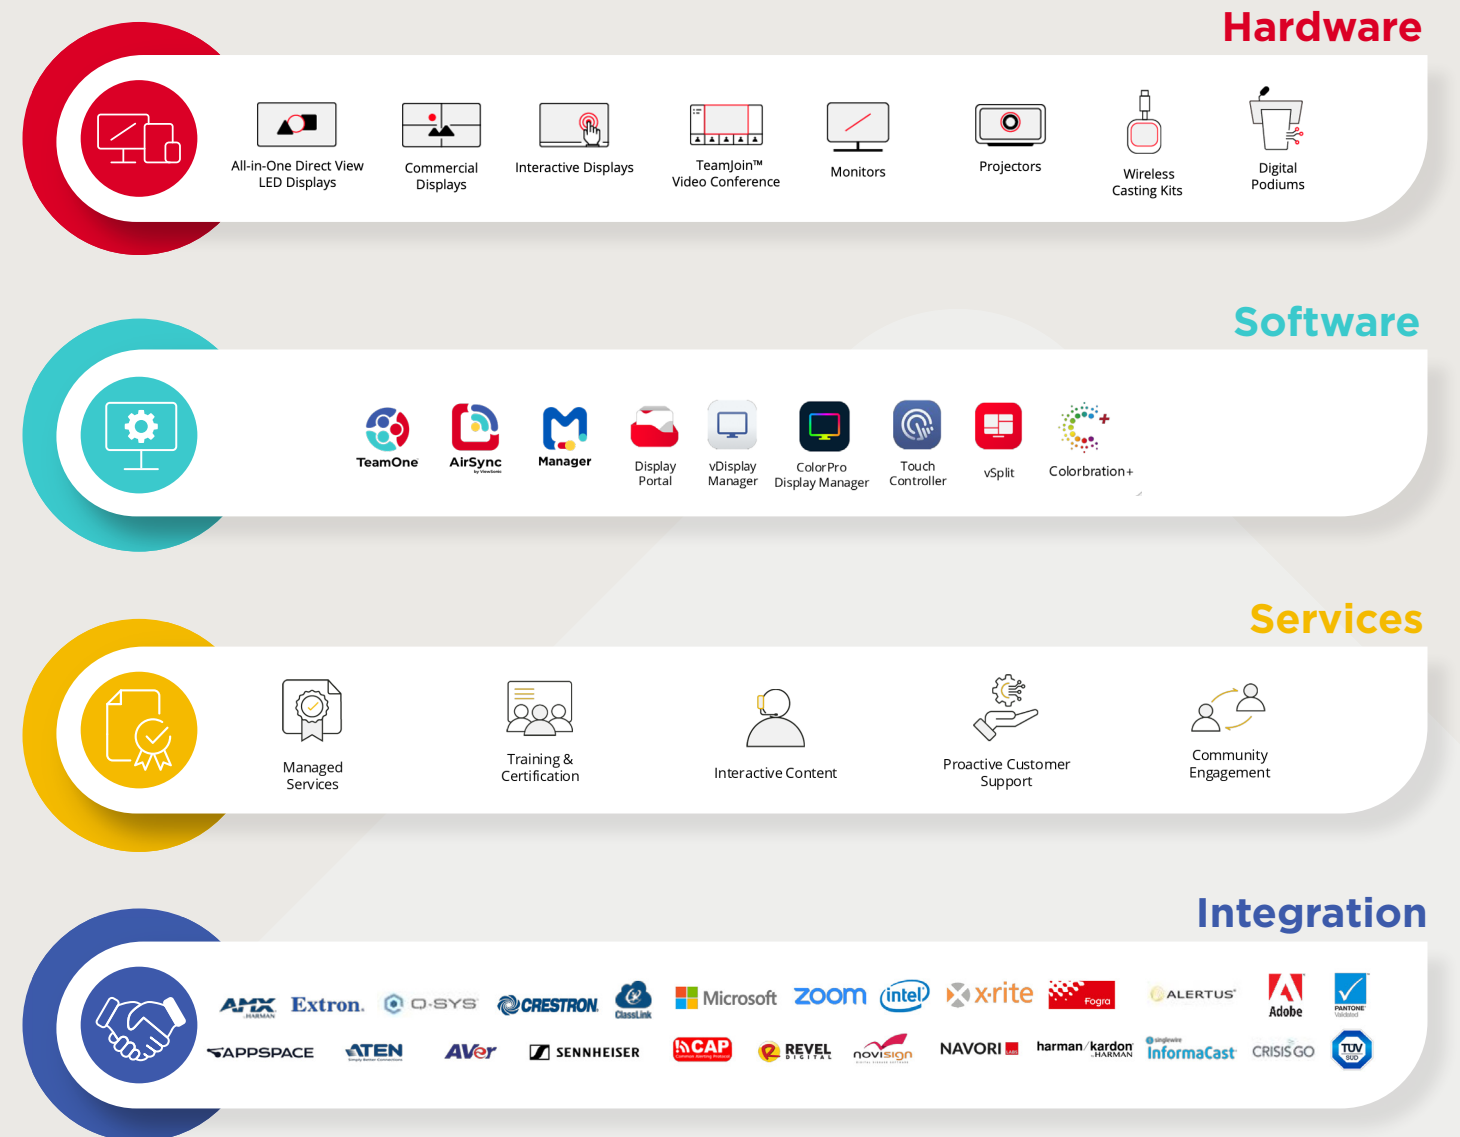

# The ViewSonic Ecosystem One Platform. Endless Possibilities.

ViewSonic transforms workspaces with innovative visual solutions. Our unified ecosystem of hardware, software, and services integrates seamlessly with the platforms and tools you trust. This powerful combination empowers creativity and collaboration, simplifying today's digital world.

Easy to use, highly scalable, and inherently secure, our ecosystem enables professionals and individuals to create, work, learn, and collaborate more smoothly and effectively than ever.

# All-in-One Direct View LED Displays

## Pre-Configured, Customizable, and Mobile Video Wall Solutions

Discover the unparalleled advantages of ViewSonic® All-in-One Direct View LED (dvLED) displays – engineered for effortless design, seamless integration, easy serviceability, and long-term durability.

Choose from pre-configured, customizable, or mobile video wall solutions to fit conference rooms, lobbies, training spaces, and more. Whether you're enhancing collaboration or making a bold visual impact, ViewSonic delivers a simple, reliable solution that transforms any commercial environment.

- **LDS Series:** Foldable 1080p video wall on wheels that can be moved from location to location and built for high-use environments.
- **LDE Series:** Pre-configured, cost-effective 1080p video wall solutions with integrated power and processing, and Glue-on-Board (GOB) technology.
- **LDM Series:** Pre-configured, feature-rich 1080p video wall solutions with built-in Android OS, enhanced collaboration tools, and options for Glue-on-Board (GOB) and Chip-on-Board (COB) technology.
- **LDP Series:** Pre-configured, premium 4K video wall solutions with stunning resolution, high contrast ratio, and advanced Chip-on-Board (COB) technology.
- **LDC Series:** Configurable video wall solutions with custom resolutions and non-standard aspect ratios ideal for unique spaces.

All-in-One Designs

Modular LED Tiles

Front-Accessible Maintenance

Up to 4K Ultra HD Resolution

PIP/PBP Support on Select Models

# LDE Series

## Affordable, Pre-Configured Video Walls for Any Space

Experience big-screen impact without the big hassle or big price tag. The ViewSonic LDE Series of Direct View LED (dvLED) displays is pre-configured, affordable, and easy to set up. With everything built in, installation is simple, operation is smooth, and maintenance is minimal.

- **Immersive Screen Sizes:** Choose from 108", 136", and 163" options.
- **Innovative All-in-One Design:** Power, controls, and image stitching built directly into the cabinets for a clean, seamless look.
- **Simplified OS:** Plug-and-play setup lets clients go from power-on to brilliant content in seconds.
- **Built to Last:** Glue-on-Board (GOB) protection with IP54 and IK06 ratings shields LEDs from bumps, dust, and moisture.
- **Easy Maintenance:** Hot-swappable front modules and included suction tool make LED replacement quick. Calibrated spare tiles are included to minimize downtime.
- **Integrated Management:** Q-SYS certified and compatible with Crestron, Extron, and AMX.
- **ADA Compliant:** These displays feature a slim profile with less than 4 inches of depth and adhere to ADA compliance standards.
- **Unmatched ViewSonic Support:** Our Field Solutions team offers consultation from design to installation. Plus, count on us for US-based inventory and support.

# LDM Series

## Pre-Configured, All-in-One Simplicity

Upgrading your boardroom? You shouldn't have to compromise between smart features and clean design. The ViewSonic® LDM Series features a built-in Android OS, advanced collaboration tools, and a hidden control bar for a flawless, bezel-free look.

- **Immersive Screen Sizes:** Choose from 136", 163", and 231" options.
- **Flexible, Hassle-Free Installation:** A modular, user-friendly design ensures quick and easy setup. The system control bar comes pre-attached to the bottom of the display for standard installation. Optional accessory kits are available for hidden or separate installations.
- **Durable Design:** Options with Glue-on-Board (GOB) or Chip-on-Board (COB) technologies deliver exceptional durability. With IP54 ratings and up to IK08 impact resistance, these displays withstand daily wear, ensuring superior protection against bumps, dust, and moisture for any application.
- **Easy Screen Casting and Sharing:** With our ViewSonic AirSync software, you can wirelessly share your screen from any device. It even works with tools you already use, like AirPlay and Google Cast. No cables, no hassle.

\*AirSync is available with an OTA firmware update.

## LDP Series

### Pre-Configured 4K High-Performance

The LDP Performance series of Direct View LED displays brings bold 4K visuals to life with all-in-one simplicity and advanced Chip-On-Board technology. Built for impact in boardrooms, lobbies, and auditoriums, these sleek displays deliver brilliant color, immersive sound, and effortless setup. From powerful performance to premium design, the LDP series makes it easy to go big without the complexity.

- **Immersive Screen Sizes:** Choose from 136", 163", and 217" options.
- **Stunning 4K Resolution:** With a sleek frameless design and 4K UHD resolution, these displays deliver vibrant, immersive imagery that captivates from every angle. Featuring 10,000:1 contrast ratio, 600 nits of brightness, a wide 120% Rec.709 color gamut, and a smooth 3,840 Hz refresh rate, visuals stay sharp and impactful even in bright, high-traffic environments.
- **Chip-On-Board Technology:** Chip-on-Board (COB) technology delivers tighter pixel pitches for exceptional detail without compromising reliability or durability. With IP54 rated dust and moisture protection and IK08 impact resistance, it withstands demanding environments. Perfect for high detail applications, COB ensures stunning image fidelity and ultra-high resolution.
- **All-in-One Integration:** ViewSonic Direct View LED displays serve as a simplified solution with an integrated LED display, image stitching, power supply, and embedded control systems. This all-in-one design eliminates the need for a complicated setup process – all you need to do is turn on the display.
- **Flexible Installation with System Control Bar:** A detachable system control bar can be mounted up to 30 feet away, giving you greater flexibility when installing the display in hard-to-reach or discreet locations. Once the control bar is detached, the display achieves an impressive 99% screen-to-body ratio, allowing the display to blend effortlessly into any space or décor.

\*Accessory kits for hidden and separate installations sold separately.

## LDS Series

### Foldable and Mobile Video Wall on Wheels

Need flexibility on the move? The LDS138-151 mobile display brings Direct View LED technology to any space with ease. Featuring a foldable 138" screen, GOB surface protection, and a robust, height-adjustable stand, it's perfect for dynamic presentations and portable digital signage in corporate and educational settings. Simply roll it in, unfold, and power on.

- **Easy Setup:** Experience effortless setup in just minutes – no wall mounting or complex installation needed. Simply unfold, plug into a standard 20-amp outlet, and you're ready to impress with vibrant visuals anywhere.
- **Mobile and Foldable:** This display effortlessly glides between training rooms, lobbies, and event spaces with smooth, 360-degree silent wheels. Its innovative foldable design enables the display to fit into large passenger elevators, while an included flight case provides secure protection during transport between venues.
- **Durable and Reliable:** A commercial-grade motorized stand and patent-pending hinge design provide enhanced stability, even with heavy usage. Glue-on-Board (GOB) technology offers incredible surface protection with IP54-rated dust and moisture resistance and IK06 impact resistance.
- **Integrated Control Bar:** A user-friendly control bar is built into the floor stand, maximizing the screen area and keeping the display front clean and uncluttered.

## LDC Series

### Configurable All-in-One Direct View LED Displays

The LDC series breaks free from traditional 16:9 constraints, allowing you to design the perfect video wall for your specific needs. Whether you require a unique aspect ratio or digital signage of extraordinary dimensions, the LDC series delivers.

- **Flexible Cabinet Size:** The LDC series lets you design a Direct View LED video wall perfectly tailored to your space. Every Direct View LED video wall is comprised of multiple LED tiles within an LED cabinet. Depending on your desired screen size and aspect ratio, the quantity of LED cabinets will vary.
- **Pixel Pitch:** Choose from four distinct LDC Direct View options – 1.2, 1.5, 1.8, and 2.5 pixel pitch – to design a video wall that delivers the optimal viewing experience for your space and audience. These pixel pitch variations cater to a range of viewing distances, ensuring stunning visuals no matter where viewers stand.
- **Resolutions:** Regardless of the shape, size and configuration of your video wall, rest assured that it will deliver amazingly vibrant and stunning images in 1080p, 4K and non-standard resolutions.
- **Tough and Reliable Glue-on-Board (GOB) Technology:** GOB surface treatment with IP54 and IK06 ratings protects against dust, moisture, and impact.
- **Trusted Partnership from Design to Post-Installation:** An experienced ViewSonic Field Solutions Architect will guide you through every step—design, site prep, product and spec recommendations, and installation prep—at no extra cost. We'll also verify site readiness and provide on-site supervision during installation.

# Commercial Displays

## Large Format Visual Communications

Designed for optimal efficiency in meeting rooms and classrooms, ViewSonic's commercial displays range from 43" to 105" and deliver up to 5K resolution with high brightness and ambient light rejection. Built for 24/7 operation, these displays feature versatile ProAV connectivity, including USB-C with power delivery for single-cable solutions. With ViewSonic Manager/Advanced and AirSync wireless screen sharing, they simplify remote management and content delivery, improving collaboration and campus-wide communication.

- **CDE31 Series:** An all-in-one 4K display platform built for 24/7 usage, seamless collaboration, stunning signage, and PC-free performance.
- **CDEUW Series:** 5K ultrawide displays with a panoramic 21:9 aspect ratio that deliver 33% more screen space than traditional displays and is optimized for Microsoft Teams Rooms.
- **CDEG3 Series:** 24/7 4K performance with OS-free flexibility, secure instant-on operation, enterprise-level security, and future-proof connectivity.
- **CDE14 Series:** Enjoy simple content sharing and high-impact messaging at a great value.

# CDE31 Series

## 24/7 Performance with Quick Start Up

The ViewSonic CDE31 series of digital displays makes meetings more efficient and signage more impactful—right out of the box. With near instant-on performance, built-in 4K playback, and a secure Android platform, there's no need for extra hardware or wasted setup time. A single USB-C cable simplifies connectivity by delivering power, 4K video, and data—reducing clutter and speeding up installation. And 500-nit brightness with anti-glare glass keeps content clear in any light. Certified for top control systems and built for 24/7 reliability, these displays offer incredible all-around performance.

- **4K UHD Clarity:** Deliver sharp text, vivid graphics, and lifelike video in landscape or portrait mode.
- **Fast Boot (~8 sec):** Boots up fast for less wait time and immediate content delivery.
- **Built-In Performance:** Run apps and signage locally—no lag, no external media player needed.
- **One-Cable USB-C:** Power, video, and data through a single 65W cable to cut clutter and simplify setup.
- **500-Nit Brightness:** Ensure visibility in bright rooms, lobbies, or retail environments.
- **24/7 Operation:** Commercial-grade design built for continuous, around-the-clock use.
- **Flexible Orientation:** Mount in portrait or landscape without sacrificing image quality.
- **Wireless Casting:** AirSync software allows you to wirelessly mirror your screen from any device to a larger display using our secure app or your web browser.
- **Simple Device Management:** ViewSonic Manager™ software offers an intuitive interface for secure remote management.
- **Certified CMS Partners:** Revel Digital, NoviSign, AppSpace, Navori, and ViewSonic Signage Manager.

# CDEG3 Series

## For Maximum Security

The CDEG3 series of digital displays features a fully OS-free design—to minimize risk and simplify compliance. With near instant-on 4K visuals and versatile connectivity, it's the secure, flexible display platform built to scale across your organization.

- **Enhanced Security:** An OS-free architecture with no pre-installed software reduces potential vulnerabilities and helps IT teams uphold rigorous security and compliance requirements.
- **Pure Visual Performance:** Delivers true 4K UHD resolution, 500-nit brightness, and 24/7 reliability—uninterrupted by OS overhead—for clear, vibrant content in any space.
- **Fast Boot (~8 sec):** Boots up fast for less wait time and immediate content delivery.
- **Plug-and-Play BYOD:** Works seamlessly with various laptops, mini PCs, media players, or external OPS modules. No lock-in, no retraining, and no compatibility headaches.
- **Low-Maintenance for IT:** No resident OS means fewer patches, updates, or software management tasks, freeing IT to focus on higher-value work.
- **Enterprise-Ready Durability:** Built with commercial-grade components, a metal chassis, and backed by an industry-leading warranty for long-term, around-the-clock performance.
- **Seamless IT and AV Integration:** These displays integrate into the Q-SYS Ecosystem via a Q-SYS LIBRARY VERIFIED plugin. They are also compatible with Crestron, Extron, and AMX.

## 21:9 Screens for Microsoft Teams Rooms

With huge screen sizes and 21:9 aspect ratio, our ultrawide large format displays deliver a nearly infinite canvas perfect for meeting room collaboration and brainstorming. The combination of Microsoft Teams Rooms and Front Row fosters inclusivity by enabling all participants, whether remote or on-site, to actively participate in discussions, share ideas, and collaborate in real time.

- **Incredible 5K Ultra HD Resolution:** Native 5120 x 2160 resolution delivers over 11 million pixels for sharper and clearer visuals. Plus, the extra screen real estate boosts multitasking by allowing you to open applications side-by-side without sacrificing readability.
- **Bright and Reliable:** 500-nit, high-brightness displays boast a 24/7 reliable design and a 25% high haze anti-glare treatment, ensuring exceptional clarity and vibrant visuals even in brightly lit environments.
- **Simple Screen Sharing:** AirSync software lets you wirelessly mirror your screen from any device to a CDEUW display using our secure app or web browser. AirSync also supports built-in casting like Airplay and Google Cast.
- **Versatile and Flexible Installation:** Uniform bezels and versatile portrait/landscape mounting deliver a seamless, professional look for a variety of installation needs.
- **Device Management** ViewSonic Manager™, an easy-to-use web-based application, allows you to securely set up, manage and maintain all of your displays from a centralized dashboard.
- **Powerful Sound:** Immersive 2.1 sound system with 60W total power (two 30W speakers + 30W subwoofer) delivers crystal-clear dialogue and rich, room-filling bass—perfect for dynamic presentations, video conferencing, and multimedia playback.

# ViewBoard® Interactive Displays

Elevate your meeting spaces with ViewSonic® ViewBoard® interactive displays—designed to streamline collaboration, enhance presentations, and boost productivity. With high-precision touchscreens and digital whiteboarding, teams can brainstorm, present, and annotate in real time.

Integrated TeamOne software enables real-time annotation and shared whiteboard access across any device and location. Plus, ViewSonic Manager™ software enables remote device control for streamlined IT workflows.

## ViewBoard® IFPUW Series

### 21:9 Ultrawide Collaboration Displays

With huge touchscreens and a 21:9 aspect ratio, the ViewSonic® ViewBoard® IFPUW series of ultrawide interactive displays offers a collaborative canvas that is wider than it is tall. This ensures that content remains easily accessible and interactive for users of all heights.

- **21:9 Aspect Ratio Ideal for Inclusive Meeting Spaces:** These ultrawide collaboration displays boost multitasking by allowing you to open applications side-by-side without sacrificing readability. When paired with Microsoft Teams Rooms and Front Row, the IFPUW series fosters greater inclusivity by enabling all participants to be seen, heard and understood.
- **Incredible 5K Ultra HD Resolution:** Native 5120 x 2160 resolution delivers over 11 million pixels for sharper and clearer visuals.
- **ViewSonic TeamJoin™ Solutions for Microsoft Teams Rooms:** We provide affordable one-touch video conferencing solutions certified for Microsoft Teams Rooms. These optional items include touch consoles, computing engines, 4K PTZ cameras, and more, ensuring seamless collaboration in any environment.
- **TeamOne Collaboration on a Grand Scale:** ViewSonic TeamOne™ software transforms this massive touchscreen into an infinite digital whiteboard. Sketch freely, annotate ideas, share documents and images – all without ever running out of room.

### Collaboration with Security and Precision

The IFP63 series of ViewBoard interactive displays delivers powerful collaboration with ultra-responsive PCAP touch, robust enterprise software, and a sleek design. Built for modern meeting spaces, they enable seamless presentations, real-time collaboration, and efficient hybrid teamwork.

- **Enterprise-Grade Security:** Android EDLA with auto updates, data encryption, and two-way authentication—plus full access to Microsoft 365 via Google Play.
- **PCAP Touch for Precision Collaboration:** Smooth, precise, multi-user interaction on a durable glass surface—ideal for fast-paced corporate environments.
- **Optimized for IT Management:** Works with ViewSonic Manager™, Google Workspace, and Intune for easy deployment, remote control, and policy enforcement.
- **Integrated Software for Smarter Meetings:** Includes TeamOne™, AirSync™, and more—enabling wireless sharing and real-time teamwork, right out of the box.
- **ViewSonic TeamOne™ Software:** This intuitive and robust software suite delivers an infinite digital whiteboarding canvas for secure, scalable, real-time collaboration and productivity for any team, anywhere.
- **Instantaneous Collaboration:** Write-Away Technology enables instant annotation and note-taking the moment the display powers on—maximizing productivity from the first touch.

## ViewBoard® IFPG1 Series

### OS-less Design for Enhanced Security

For businesses that prioritize network security and meeting room simplicity, ViewSonic® ViewBoard® IFPG1 interactive displays are designed without an OS to minimize cyber threats and safeguard user data. This OS-free design allows users to connect their preferred devices and keep presentations engaging.

- **No Operating System, No Threats:** Without an OS, malware has nowhere to run, minimizing the risk of cyberattacks.
- **Always Up-to-Date:** No OS updates means no security vulnerabilities from outdated software.
- **Reduced Data Leaks:** No local data storage minimizes the chances of data breaches.
- **Wired Connections, Enhanced Security:** Wired connections eliminate Wi-Fi risks such as unauthorized network access and data interception.
- **Bring Your Own Devices:** Customize your digital whiteboarding experience by adding an external PC or OPS module. Enjoy fewer complications with an interactive display that integrates seamlessly into your existing technology environment.
- **Instantaneous Collaboration:** Write-Away Technology enables instant annotation and note-taking the moment the display powers on—maximizing productivity from the first touch.

# ViewBoard® IFP41 Series

The ViewSonic® ViewBoard® IFP41 series delivers the right mix of performance, simplicity, and value for modern meeting spaces. Available from 55 to 98 inches, these interactive displays feel intuitive from day one, so users can start presenting without complicated setup.

**Multitask Without Lag or Delays:** An upgraded octa-core CPU and DDR5 high-bandwidth memory delivers faster load times and stable performance.

**Native Google & Microsoft Access:** EDLA certification provides direct access to Google Play apps, Google Workspace, and Microsoft 365.

**Smooth Writing Experience:** 64-point multi-touch supports multiple users writing or drawing at the same time. Palm rejection ignores accidental touches, so writing is accurate and distraction free.

**Smart Design:** Ambient light and motion sensors adjust brightness and power automatically. Displays wake when users approach and power down when idle.

# ViewBoard® IFP51 Series

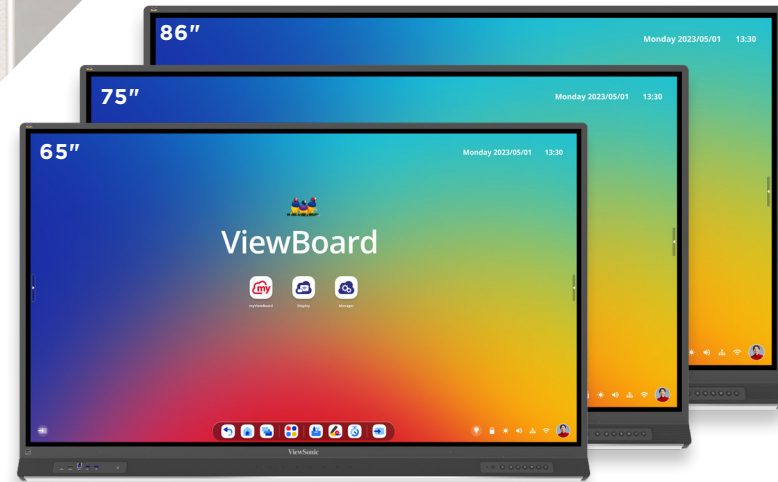

Android™ EDLA-Certified

Enhance team collaboration with the ViewSonic® ViewBoard® IFP51 Series—interactive displays available in 55" to 98" sizes. Powered by Android™ EDLA, they offer instant access to Google and Microsoft 365 tools. With responsive 50-point touch, integrated software, and powerful audio, the IFP51 series is ideal for presentations, whiteboarding, and hybrid meetings. Plus, a super-fast octa-core processor and a massive 16GB of RAM lets you run all your demanding apps, multitask, and keep your presentation moving.

- **Built to Perform:** A fast octa-core processor and 16GB of RAM keep up with every app and presentation. Front-facing 70W speakers and an integrated subwoofer fill the room with clear sound, while an 8-array mic ensures every voice is heard.
- **Android 14 EDLA:** Built-in Google security, data encryption, and easy management tools keep your network and devices safe. Enjoy built-in access to Google Drive, Docs, and Slides, as well as Microsoft 365 apps like Word and Teams, all from one place.
- **Collaboration Software Included (No Extra Cost):** Enhance productivity with a suite of pre-installed ViewSonic solutions, including TeamOne for interactive whiteboarding, ViewSonic Manager™ for streamlined IT asset management, and ViewSonic AirSync™ for wireless content sharing.
- **Sign In and Start Fast:** QR code, NFC, or SSO login means no more delays—just tap in and get going.
- **Smooth, Natural Writing for Everyone:** Responsive 50-point touch enables you to write and draw with fingers and pens, while palm rejection keeps things accurate even when multiple presenters join in.
- **ViewSonic TeamOne™ Software:** This intuitive and robust software suite delivers an infinite digital whiteboarding canvas for secure, scalable, real-time collaboration and productivity for any team, anywhere.
- **Instantaneous Collaboration:** Write-Away Technology enables instant annotation and note-taking the moment the display powers on—maximizing productivity from the first touch.

## ViewBoard® IFP53 Series (TAA Compliant)

### Bright, Streamlined Collaboration

The IFP53 series delivers a streamlined collaboration experience on a brilliant display, perfect for well-lit environments. Powered by the latest Android™ EDLA platform, these interactive screens are engineered for boardrooms and command centers where clarity, speed, and enhanced security are paramount. With high-precision touch technology and digital whiteboarding, teams can effortlessly brainstorm, present, and annotate in real time.

- **Robust Security & Management:** Safeguard networks with built-in security, including automatic Google updates and encryption. IT teams can effortlessly manage devices, deploy apps, and maintain centralized control using ViewSonic® Manager, Google Workspace, or Microsoft Intune.
- **Google Play Integration:** Access hundreds of essential apps via the Google Play Store, enabling real-time collaboration with native support for both Google Workspace and Microsoft 365.
- **ViewSonic TeamOne™ Software:** This intuitive and robust software suite delivers an infinite digital whiteboarding canvas for secure, scalable, real-time collaboration and productivity for any team, anywhere.
- **Sign In and Start Fast:** QR code, NFC, or SSO login means no more delays—just tap in and get going.
- **Responsive Touchscreen:** A 40-point multi-touch display allows multiple users to write simultaneously with fingers or styluses.

## ViewShare WPD-900 Wireless Presentation System

Whether you're in a meeting or a classroom, the award-winning ViewShare™ WPD-900 lets you present wirelessly with confidence.

No complicated setup. No tech headaches. Just seamless sharing.

- **Instant Presentations:** Plug in and start casting instantly without the need for network setup, software installation or app downloads required.
- **Universal Compatibility:** Works seamlessly with almost all mobile devices via Miracast and AirPlay.
- **Internet-Free and Wi-Fi-Free Connection** Connect your devices directly to one another without needing the internet or a Wi-Fi router. This gives you a steadier, more secure connection and enables easy, peer-to-peer (P2P) seamless sharing.
- **Pass-Through Charging:** Charge your device and share your screen simultaneously via the external USB-C port.
- **Long-Range Wireless Transmission:** Wirelessly cast content from up to 98 feet away - ideal for larger conference rooms, classrooms, or auditoriums.

## ViewSonic TeamJoin™ Solutions

ViewSonic® TeamJoin™ video conferencing solutions enable you to initiate video conferences with just one touch, enhancing collaborative efficiency. These solutions are certified for Microsoft Teams Rooms and can be paired with our 21:9 aspect ratio displays to optimize the meeting experience for all attendees.

### Certified for Microsoft Teams Rooms

Our conference room solutions are all integrated with Microsoft Teams to provide optimized setup, enhanced security, crisp audio and crystal-clear video performance. Our Microsoft Teams Rooms certified portfolio offers a one-stop solution that can easily scale based on your needs and meeting space size.

- **Computing Engine:** The ViewSonic® MPC51WT is a nimble compute system with a 12th generation Intel Core™ i5 processor for optimized business productivity and collaboration. The processor also supports three HDMI v2.1 outputs and up to three displays.
- **Touch Console:** The MRC111T touch console offers intuitive touch control and easy meeting scheduling. This 11.6" touch display offers an easy-to-use Microsoft Teams interface that allows you to start, join, and manage meetings—all from your fingertips.
- **4K PTZ Camera:** Capture every angle with the UMC211T 4K PTZ Camera—featuring dual-lens panoramic + PTZ coverage, AI auto-framing, speaker and presenter tracking, and simple plug-and-play setup for professional, dynamic meetings in any space.
- **Speakerphone:** Deliver clear, natural conversations with the UMS301T Speakerphone—featuring 360° voice pickup, AI noise suppression, full duplex audio, and scalable daisy-chain coverage for seamless meetings in rooms up to 323 square feet.

# Business Monitors

With easy setup and fast deployment, ViewSonic business monitors improve productivity and help lower total cost of ownership for your enterprise. Our diverse portfolio includes monitors with advanced connectivity options like Thunderbolt™, USB-C, and Ethernet, streamlining workstation setup, simplifying device management, and driving greater workplace efficiency.

## VG Series

Advanced ergonomic features, future-proof connectivity options, and integrated docking stations in select models make ViewSonic VG series monitors incredibly adaptable. Easy deployment and eco-friendly packaging help lower your total cost of ownership.

## TD Series

With innovative touch displays ranging from desktop and portable models, to front-of-room podium displays and wayfinding kiosks across your business campus, we offer a variety of interactive touchscreen options to fit your different needs.

## VP Series

Ideal for executives, professional creatives, and more, ViewSonic® ColorPro® VP monitors deliver high resolutions and incredible color accuracy for a optimum performance.

## VA Series

Backed by the ViewSonic reputation for quality and reliability, these monitors deliver rock-solid dependability and outstanding performance at a great value.

# Mac-Matched Monitors

Designed to integrate seamlessly into a Mac-based workflow, ViewSonic® VP monitors deliver the performance and reliability enterprise professionals and creative teams need. With features like Thunderbolt™ 4 connectivity, up to 100W charging, and daisy-chaining support, these displays keep corporate offices, creative studios, and editing suites connected and clutter-free.

- **Crisp Visuals:** Available in 4K and 5K resolutions, these monitors provide exceptional detail and clarity, ideal for data visualization, high-resolution content, and graphic design.
- **Accurate Color for Reproduction:** DCI-P3 color gamut coverage ensures true-to-life colors, essential for creative professionals in marketing, photography, and design.
- **Powerful Connectivity:** Thunderbolt in/out ports let you connect and power dual monitors through a single cable for streamlined setups in any workspace.
- **Enhanced Productivity:** Lightning-fast 40 Gbps data transfer keeps tools and resources running smoothly.
- **Built-in Power:** Up to 100W charging keeps MacBooks ready to go without extra adapters or clutter.
- **Flexible Integration:** Along with Thunderbolt 4, HDMI and DisplayPort inputs ensure compatibility across a range of Apple devices.

## Featured Products

- VP2488-4k
- VP2788-5K

## Professional Monitors

ViewSonic® VP series monitors empower professionals with unmatched clarity and expansive screens. Factory-calibrated for exceptional color accuracy, VP displays deliver stunning visuals ideal for executives making critical decisions or creative professionals tackling demanding design and engineering tasks. Experience visual perfection and maximized real estate, boosting productivity for every step of your workflow.

- **Stunning Visuals:** Factory-calibrated for stunning accuracy out of the box, these displays boast up to 1 billion colors and support a wide color gamut. High resolutions up to 5K ensure exceptional detail.
- **Loaded with Connectivity:** Whether PC or Mac, HDMI, Thunderbolt 4, or USB Type-C, ColorPro monitors are loaded with versatile connectivity options that deliver maximum flexibility for any ecosystem.
- **Boost Productivity:** Optimize your workflow with a range of sizes, resolutions, and form factors (21:9 aspect ratio, curved screens) to suit any task. From everyday spreadsheets to intricate design work, find your perfect fit. Select models even feature G-Sensor auto-rotation, seamlessly switching between portrait and landscape modes to keep you focused and productive.
- **Designed with Purpose:** Prioritizing both style and function, sleek designs integrate thoughtful features like improved cable management and easy-access controls, keeping your workspace organized. Ergonomic stands offer exceptional flexibility for positioning, promoting user comfort and focus during extended work sessions.

## Thunderbolt™ 4 Monitors

Today's business laptops are more powerful than ever, and Thunderbolt connectivity is quickly becoming standard. While USB-C monitors are excellent for general office productivity, high-performance workflows often require more bandwidth. ViewSonic Thunderbolt 4 monitors are built for teams working with large files, multiple displays and high-resolution content. They deliver clear visuals, reliable performance and future-ready connectivity that keeps teams productive.

- **Lightning-Fast Transfers:** Transfer large files in seconds with up to 40 Gbps of bandwidth.
- **The Power of One Cable:** Power, video, and data through a single cable. Less clutter. Faster setup.
- **Built-In Docking Station:** An integrated RJ45 wired Ethernet connection, a USB hub for accessories, and single-cable Thunderbolt connectivity eliminates the need for a separate and costly docking station.
- **Daisy-Chain Multiple Devices:** Connect up to six devices and even up to dual 5K displays from one port.
- **Designed for Modern Laptops:** Seamless integration with Mac and Windows Thunderbolt systems, with USB-C compatibility when needed.

# Designed for Surface Monitors

Connect to your Microsoft Surface on a deeper level and upgrade your workspace with a ViewSonic® VG245, VG275 or VP275-4K monitor. Specially developed based on the Microsoft Designed for Surface (DfS) Program, these are the first DfS-certified monitors that work seamlessly with any USB-C Surface product.

- **Designed for Surface:** Designed for Surface (DfS) products undergo extensive testing and validation with Microsoft for optimal use with Microsoft Surface products.
- **Single-Cable Solution:** Connect directly to your Surface device via USB-C, reducing the reliance on multiple wires, cables, and adapters. In addition to audio and video transfer, USB Type-C also provides quick 60W charging over a single cable.
- **A More Comfortable Workspace:** With advanced ergonomic features including swivel, pivot, height adjust, and tilt, these monitors provide a greater range of adjustment for increased productivity and comfort.
- **USB Hub:** USB-A ports offer connectivity options for your Surface and DfS peripheral accessories such as a mouse and keyboard.

# Video Conferencing Monitors

The ViewSonic VG57V series delivers Zoom-certified video conferencing and docking performance, along with Windows Hello-certified sign-on for secure access. Our VG41V models also feature Windows Hello for fast and secure authentication, giving you clear, secure, and connected experiences across both series.

## Our VG57V series may include features such as:

- **Versatile Screen Sizes:** Available in a 24" FHD model, a 27" QHD model, and a 34" UWQHD curved model
- **Secure Sign-On:** Windows Hello facial recognition compatibility for safe, password-free, single user sign-on
- **Built-In Conferencing Tools:** Integrated Zoom-certified 5MP pop-up camera, microphone and front-firing 5W speakers
- **Single-Cable Connectivity:** USB-C connectivity with up to 100W power delivery and RJ45 Ethernet
- **Connect Multiple Screens:** Daisy-chain capabilities for full and complete docking solutions

USB-C with up to 100W Power

## Our VG41V series may include features such as:

## ViewSonic TeamOne™ Software

ViewSonic TeamOne™ software is a simple whiteboarding and in-room collaboration solution, featuring pre-built templates designed for a variety of meeting environments.

- **Enhance In-Person Teamwork:** Designed specifically for shared spaces, TeamOne brings your team together for seamless, real-time collaboration, making face-to-face meetings more connected and dynamic.
- **Boost Meeting Engagement:** Transform passive presentations into highly interactive sessions. By giving everyone an easy way to contribute to the shared whiteboard, participants stay focused and actively involved.
- **Drive Team Productivity:** Quickly capture ideas and streamline your group brainstorming. With a straightforward interface and ready-to-use templates, your team spends less time setting up and more time generating actionable results.

## ViewSonic AirSync™ Software

This wireless casting software allows you to wirelessly mirror your screen from any device to a larger display using our secure app or your web browser. AirSync also supports built-in casting like Miracast, Airplay, and Google Cast, making it easy to share content quickly and securely.

- **Flexible Casting:** Thanks to touchback control, you can manage casting to the meeting room display directly from a laptop or tablet (supports up to 10 devices).
- **Secure Moderator Mode:** Control the content on display by keeping up to six participants in a virtual waiting room before approving screen sharing.
- **Split Screen:** Simultaneously show multiple screens of multiple devices on the main front-of-room display. This is great for collaboration and discussions.
- **Display Grouping:** Broadcast the main display across up to 10 large, networked screens for synchronized viewing.
- **Universal Compatibility:** Users can participate from any compatible device (MacBook, iPad, Windows laptop, Android tablet) using AirPlay, Miracast, Google Cast, or a compatible web browser.

## ViewSonic Manager™ Software

**ViewSonic Manager™ is our FREE software** option included with select ViewSonic displays. It's an easy-to-use and robust web-based application built to optimize your digital signage network by supporting your existing CMS from a single control panel.

- **Easy CMS Support:** Streamline the deployment of third-party CMS apps (APKs) across all enterprise displays from one central dashboard.
- **Urgent Alert Broadcast:** Send critical alerts to devices using ViewSonic and third-party integrations (no additional API or APK needed for integration).
- **Cloud-Based Access:** Manage devices remotely from any web browser.
- **Easy Device Enrollment:** Quickly enroll devices using PINs, serial numbers, or QR codes.
- **Device Monitoring and Control:** Monitor and control devices 24/7 from a central dashboard.
- **App Installation:** Install and uninstall apps remotely.

**ViewSonic Manager™ Advanced is our UPGRADED subscription software** with enhanced management and automation features.

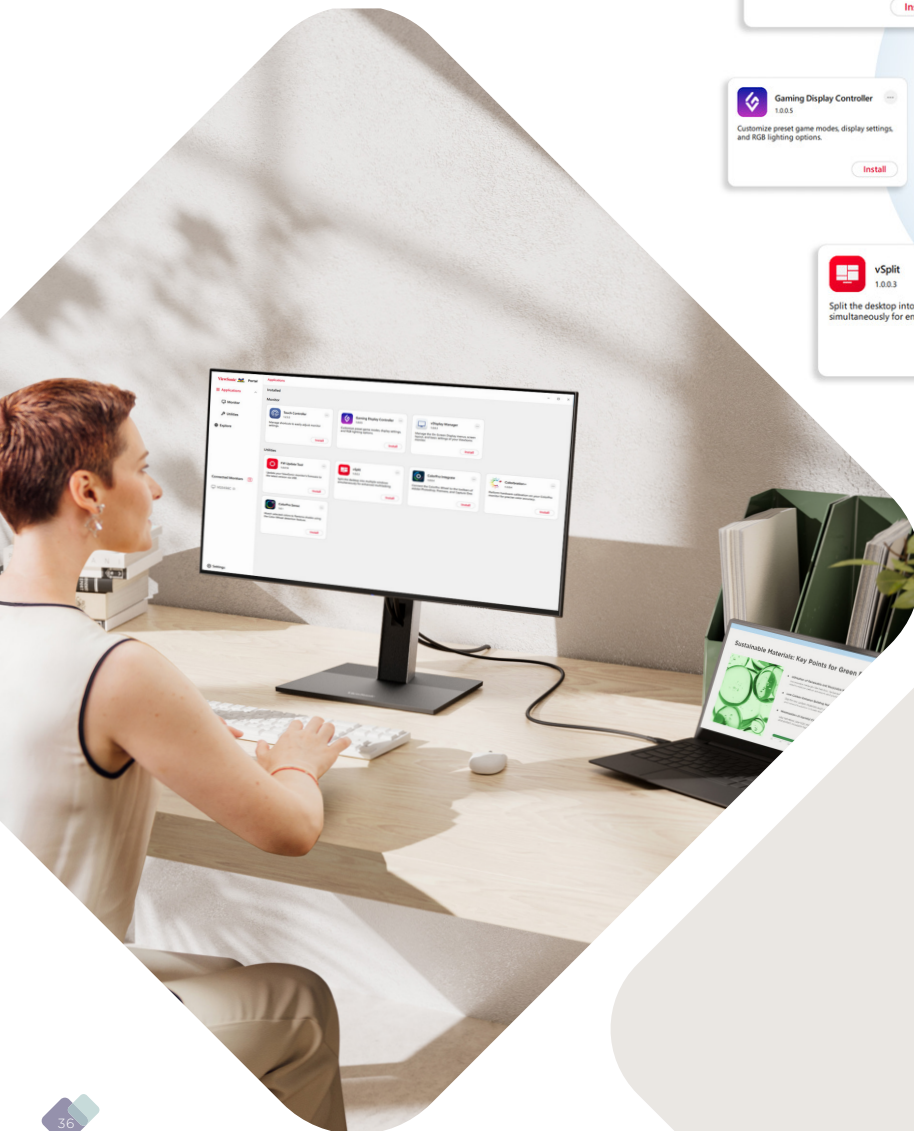

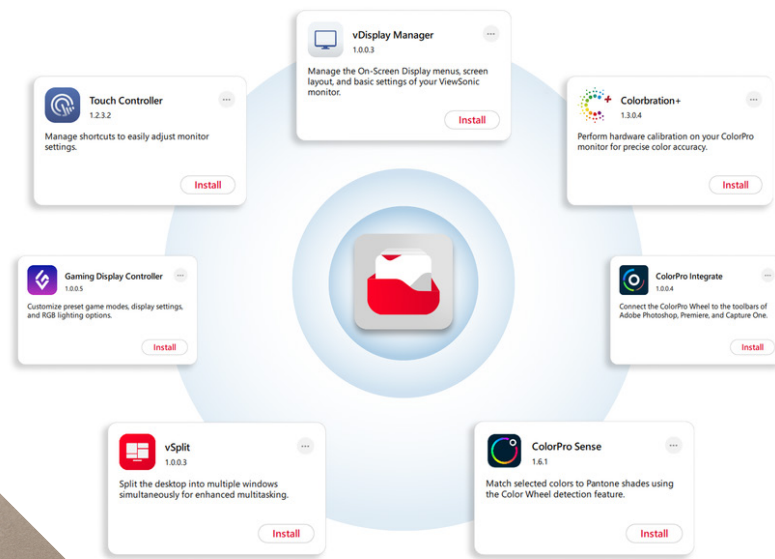

- **Multimedia Broadcast:** Display images, videos, and messages across multiple devices simultaneously for digital signage or announcements.
- **Task Scheduling:** Automate device management tasks, including power on/off, content scheduling, and more to optimize efficiency and device lifespan.
- **User Permissions:** Assign specific roles and access levels for different users to control device management and content distribution.
- **Remote Desktop:** Seamlessly monitor, manage, and remotely troubleshoot devices to ensure your third-party software is always running flawlessly.

# ViewSonic Display Portal

The ViewSonic® Display Portal serves as a centralized hub for ViewSonic monitor software. It simplifies the process of finding, learning about, and downloading various monitor controllers, model-specific features, and utility tools for different monitors.

- **Simple Monitor Management:** The ViewSonic Display Portal makes monitor management a breeze. It instantly detects your monitor model and shows all the compatible software available for immediate download or use.
- **Stay Up to Date:** An easy-to-use Firmware Update feature allows you to quickly download and install the latest firmware updates. This ensures optimal functionality and access to the newest features, and keeps your monitor performing at its best.
- **Explore the Portal:** An Explore feature includes the latest news about ViewSonic monitor and software solutions to help you create an efficient and productive workspace. Access insightful thought leadership articles, blog posts and more.

# Digital Kiosks and ePosters

Perfect for up-close, high-impact messaging, ViewSonic® all-in-one digital kiosks and ePosters feature eye-catching images within sleek and slim designs to grab attention in busy, high-traffic areas.

- **Versatile Signage Solutions:** Ranging in sizes from 10" to 55", our ePosters are designed for wayfinding directories, cafeteria menu boards, check-in kiosks in admin offices, and more.
- **Reliable and Durable Designs:** Built for the rigors of everyday school life, select ePosters feature scratch-resistant surfaces that ensure a durable, consistent, high-quality viewing experience.
- **Small Screens with a Big Purpose:** The ViewSonic® EP1052T is an all-in-one multi-function meeting room scheduler, video conferencing controller, and communication signage display wrapped into a single versatile 10.1" touchscreen.

# Digital Podium Solutions

Whether for large boardrooms, training rooms, or smaller meeting rooms, the ViewSonic® digital podium solution works with any projector or display and includes a ViewBoard® VBS200-A Smart AV Controller and a myPodium™ ID2456-4K interactive pen display. This easy-to-install, easy-to-use setup allows you to wirelessly cast presentations to your front-of-room display and annotate directly on your presentations, sketch ideas, and create a richer collaborative experience.

- **Better Engagement:** Users can annotate directly on their presentations, sketch ideas, and manipulate content while everything is mirrored on the projector screen or front-of-the-room large format display. This allows presenters to interact with their audience and improves meeting engagement.
- **Cross-platform Compatibility:** Compatible with Windows, Android, Chrome and Mac OS, the myPodium ID2456-4K delivers cross-platform touch support for any compatible BYOD device.
- **Included Device Management:** The VBS200-A Smart AV Controller includes ViewSonic Manager™ software, which gives users centralized control for their school's projectors and displays— all in one place. This instantly upgrades existing technology by enabling projectors to receive remote startup/shutdown commands, broadcast announcements, receive urgent alerts, and more.

# Complete Projection Solutions

From small meeting rooms to multipurpose rooms and large conference rooms, our projection solutions have got you covered. Whether you're looking for high brightness, LED, laser, or great price-performance models, we have the projector to perfectly fit any business environment or need.

## Complete Projection Solutions

These projectors offer maintenance-free brightness and stunning visuals, eliminating the need for replacement lamps. Eco-friendly and energy-efficient, these LED and Laser projectors reduce energy usage and costs, while instant power on/off allows users to start presentations without delay.

## Ultra-Short Throw Laser Projection

Our ultra-short throw laser projectors are the ultimate digital signage solution for public and commercial spaces such as auditoriums, museums, storefronts, shopping malls and airports. Featuring laser phosphor technology, these projectors deliver up to 5,000 ANSI lumens of brightness to ensure crisp images even in spaces with ambient lighting.

## Standard and Short Throw Projectors

Standard and short throw projectors deliver large, clear images with flexible installation options. The short throw lens allows projection from shorter distances, reducing shadows and glare, while standard throw models are perfect for longer-distance setups with maximum image clarity.
