

Make the Most of Your Devices

Upgrade to Manager Advanced

Boost device management and campus communication with myViewBoard Manager Advanced. Adding to the Standard plan, Advanced simplifies and improves schoolwide information broadcasting with multimedia messages, presentations, live streams, and playlists. It also offers IT admins extended management capabilities, including remote scheduling of ViewBoards and other device shutdowns, reducing their workload and saving energy. Plus, Advanced streamlines device optimization with enhanced device monitoring and usage reports.

Maximize School Efficiency

Conserve Energy

Save valuable man-hours and conserve energy across your entire school campus with scheduled shutdown and energy efficiency control of network devices.

- Job Scheduling
- Schedule Power On/Off
- Assign ECO Mode

Campus Communication

Streamline campus communication with photo, video, music, and message broadcasting that elevates the quality of school announcements.

- Multimedia Broadcast
- Playlist Creation
- CAP Integration

Device Performance

Conveniently monitor and optimize ViewBoards and other devices' performance through your web browser anytime, anywhere.

- Remote Desktop
- Remote Maintenance
- Real-time Usage Report
