

myViewBoard Manager

Unlock Efficiency. Anywhere.

myViewBoard Manager is a comprehensive and user-friendly centralized Device Management System (DMS) tailored for schools. This powerful and intuitive web-based DMS streamlines campus communication and simplifies the management of ViewBoard and digital signage by enabling administrators to remotely control, maintain, and update campus devices. All myViewBoard Entity users can receive complimentary access to Manager Standard, which provides essential device management and campus communication features. Manager Advanced, available through a subscription, provides additional communication, management, and performance capabilities to maximize school efficiency.

What Does Manager Do?

Centralized Management

Organize ViewSonic displays into groups for efficient batch deployment of necessary applications, files, and settings configurations.

Remote Access

Remotely control and update device firmware and software through a web-based dashboard for streamlined maintenance and optimized performance.

Campus Communication

Schedule and broadcast announcements, emergency alerts, and multimedia content throughout your school in a few simple clicks.
