

# Streamline Campus Device Management

## Challenge

Schools find it challenging and time consuming to manage the many devices spread throughout their campuses. They must perform manual maintenance, navigate complex device management systems, and address compatibility issues among devices from various manufacturers. Additionally, effective campus communication relies on separate software tools and often requires on-site staff for setup. These challenges make it difficult for schools to maintain a seamless and efficient education ecosystem.

## Solution

myViewBoard Manager is a user-friendly centralized device management solution that simplifies the management of school campus devices by providing comprehensive control over ViewSonic ViewBoards, Presentation Displays, and any devices paired with the ViewBoard Box. With its remote device control, monitoring, optimization, energy conservation, and broadcasting features, it streamlines the responsibilities of IT administrators to ensure the seamless operation of education ecosystems.

Manager

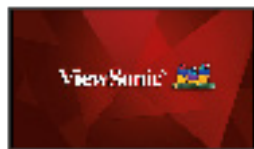

An intuitive web dashboard tailor made for managing your network's ViewSonic devices, offering centralized device control, device reports, and enhanced security. Upgrade to Manager Advanced for extended features, including task automation, file transfer, backup saves, and remote broadcasting.

## Effortless Management of ViewSonic Hardware

### ViewBoards

Interactive whiteboards for enhancing learning experiences

### Presentation Displays

Digital signage designed for events and campus communication

### All-in-One LED Displays

Expansive displays for auditoriums and large gatherings

### The ViewBoard Box

Transform any display into a myViewBoard integrated digital podium
