

Strengthen Workplace Security with Real-Time Solutions

ViewSonic Manager: Simplifying Workplace Safety Procedures

Communication infrastructure can be challenging for businesses, especially during emergencies when managing devices across large office spaces becomes complex. The ViewSonic Manager centralized device management platform offers a solution by simplifying the control of ViewSonic ViewBoards, Presentation Displays, and third-party devices paired with the ViewBoard Box. This streamlines communication, ensuring vital information swiftly reaches every corner during emergencies, keeping everyone safe and informed.

Elevate Your Safety Drills

Deliver real-time updates and clear instructions to designated groups of office displays during drills using multimedia broadcasting. Coordinate fire, natural disaster, and other emergency drills efficiently by providing precise directions to emergency exits and regrouping points, ensuring prompt, company-wide responses.

Streamline Emergency Response Alerts

Ensure swift emergency response by transforming office displays into a Mass Notification System with the CAP service integration. This automates crucial alerts, like severe weather events and natural disasters, across all displays, helping the office act quickly and stay safe.

Boost Workplace Safety Awareness

Schedule multimedia playlists to turn office displays into dynamic digital noticeboards that promote safety protocols and well-being initiatives. From emergency contact details to employee wellness programs, ensure employees know where to find the resources they need, when they need them.
