# Upgrade Your Interactive Displays, Your Way

Modernizing Classroom EdTech with ViewSonic Slot-in PCs

Whether navigating maintaining aging equipment, adapting to new ecosystems, or navigating tight budgets, every school's EdTech journey is unique. That's why we offer a smarter path forward: ViewSonic Slot-in PCs that extend the life of existing interactive displays, support popular operating systems, and unlock powerful education and device management software. It's a more sustainable, cost-effective upgrade path—free from major disruptions, high costs, or the complexity of juggling multiple vendors.

Make the Most of Existing Displays

Compatible with ViewSonic ViewBoards and interactive displays from other major brands, ViewSonic Slot-in PCs extend the life of existing hardware—reducing costs, disruption, and e-waste. It's a practical way to modernize while freeing resources for priorities like teacher professional development.

Unify Your School's Ecosystem

Consistency across classrooms doesn't require a hardware overhaul. With Android (EDLA-Certified), ChromeOS, and Windows options, ViewSonic Slot-in PCs upgrade older displays to your school's preferred platforms, creating a unified experience that flattens learning curves and simplifies troubleshooting.

Elevate School Software

Modern classrooms need software that works for everyone. ViewSonic Slot-in PCs provide teachers with intuitive myViewBoard whiteboarding tools and seamless AirSync screen casting from any teacher or student device—making lessons more engaging and dynamic.
