

ClassSwift and ClassLink Integration Streamlines Digital Learning for K-12 Schools

ViewSonic's classroom interactive software, **ClassSwift**, helps teachers instantly turn their digital curriculum and any online content into real-time interactive activities – all with just one click.

ClassSwift now integrates with **ClassLink**, a global provider of identity and rostering services, enabling seamless access to the platform and class information for school districts, teachers, and students.

Why the Integration Matters?

Easier Setup - Data Sync in a Few Clicks

Rostering imports class and user data easily from ClassLink to ClassSwift – saving time and reducing manual work for IT and teachers.

Faster Access - No More Login Barrier

With ClassLink SSO, users from school district administrators to teachers and students can log into ClassSwift instantly using their existing credentials.

Teach and Learn without Distraction

With less time spent on setup and troubleshooting, teachers and students experience a streamlined, connected workflow.
