

ViewSonic Powers Dynamic, Personalized Learning at Hanoi Toronto School

"This is a wonderful opportunity to equip our students with modern, creative tools and prepare them for a new era driven by technology. At HTS, we put education first and place learners at the heart of everything we do."

— **Lee Martin**

Principal, Hanoi Toronto School

Hanoi Toronto School

- **Location:** Hanoi, Vietnam
- **Interviewed:** Lee Martin, Principal
- **Industry:** Education

Challenge

1. **Need for 21st-century learning tools** to prepare students for a tech-driven world.
2. **Desire for deeper classroom engagement** using interactive and personalized learning methods.
3. **Lack of an integrated ecosystem** to connect hardware, software, and teaching support.

Solution

1. **ViewBoard IFP7534** brought dynamic, touch-based instruction into the classroom.
2. **myViewBoard software** empowered teachers to create and share interactive digital lessons with ease.
3. **ClassSwift AI-powered teaching tools** supported real-time lesson tracking and personalized instruction.
4. **ViewSonic Professional Development** ensured educator success with new classroom technology.

Result

1. **Improved student engagement** through interactive, visual, and hands-on learning.
2. **Empowered educators** with intuitive tools to personalize and manage lessons.
3. **Boosted digital literacy and independence** in students across all levels.

ViewSonic Powers Dynamic, Personalized Learning at Hanoi Toronto School

Hanoi Toronto School

The signing ceremony of the Future School MOU

Background

Hanoi Toronto School (HTS) is a progressive international school in Vietnam and a proud member of the International Schools Partnership, a global network spanning 87 schools in 24 countries. Operating under a strong "Learning First" philosophy, HTS is highly committed to cultivating critical thinking, creativity, and digital literacy. To live up to this philosophy, the school's leadership recognizes that digital tools must actively foster student autonomy and facilitate meaningful, real-time collaboration.

Challenge

Hanoi Toronto School faced critical challenges in evolving traditional teaching methods to meet 21st-century standards:

First, the traditional teaching resources available were not enough to keep pace with the active, collaborative, and tech-driven competencies that students need in today's rapidly changing world.

In addition, to overcome passive learning and truly place learners at the heart of their philosophy, the school needed to transition away from teacher-centric passive lecturing toward highly interactive, student-led classroom environments.

Finally, a significant hurdle was the lack of an integrated, data-driven system to track learning progress instantly, which made it highly difficult for teachers to deliver personalized, adaptive feedback to diverse students within the same lesson.

ViewSonic Professional Development Program

Solution

Rather than simply delivering isolated devices, ViewSonic worked with Hanoi Toronto School to deploy a comprehensive and intelligent learning ecosystem.

At its core are **Ultra HD ViewBoard IFP7534 interactive displays**, which replace traditional classroom boards to offer a more visual and tactile experience suited for classroom collaboration.

This hardware is supported by the **myViewBoard whiteboarding platform**, which serves as a dynamic digital canvas where teachers can easily design multimedia-rich lessons, access cloud-stored materials, and integrate gamified quizzes to keep students highly involved.

The integrated **AI-powered ClassSwift assistant** lets educators quickly push questions to student devices, track real-time performance, and analyze data to tailor instruction to individual needs.

To ensure the technology is utilized to its full pedagogical potential, **ViewSonic Professional Development** was provided through hands-on training sessions, empowering the entire faculty to earn official certifications and confidently deliver world-class digital instruction.

Students and teachers enjoying enhanced interactions with ViewSonic Education Solutions

Result

Hanoi Toronto School, now a ViewSonic Future School, has seen more engaging and exciting classrooms following the implementation of this integrated ecosystem. The **ViewBoard interactive displays**, which pair crisp visuals with ultra fine touch technology, have helped students stay interested in lessons and more easily grasp abstract concepts through hands-on digital activities.

By utilizing **myViewBoard whiteboarding software**, teachers have enjoyed more intuitive professional exchanges and collaboration. Learning materials are now easier to save, share, and comprehend, leading to highly effective lesson planning across different grade levels.

Finally, **AI-driven learning through ClassSwift** has enabled educators to instantly assess student understanding in real-time, making personalized instruction a natural and stress-free part of each school day.
