

## Interactive Displays Gain Collaborative Functionality with ViewBoard™ for Enterprise

### Challenge

The editing software on your interactive touch display(s) is limited, outdated, and/or difficult to use – perhaps even nonexistent.

You want to improve meeting efficiency with on-screen editing, note taking and content recording, but you're not in a position to purchase new hardware. Is there a cost-effective way to add this functionality to existing equipment?

### Solution

A standard feature with ViewSonic® interactive displays, ViewBoard for Enterprise is now available as a software add-on. Compatible with any interactive touch display running Windows 7, 8, 10, ViewBoard for Enterprise delivers a comprehensive set of tools for writing, note taking, and transforming documents and images onscreen. Presenters are empowered to interact with their material to visually emphasize points, clarify content, and amend information via real-time annotation that can be instantly saved and shared. Ideal for any conference room, ViewBoard for Enterprise is an easy, cost-effective way to boost the performance of existing interactive whiteboard displays with:

- A simple, customizable interface
- Convenient, practical presentation tools
- Support for all major media types
- Simultaneous annotation by multiple users for an enhanced collaborative experience

What you'll need to add robust collaborative tools to your existing interactive display running Windows 7, 8, 10:

► ViewSonic SW-019 ViewBoard for Enterprise software. Features and functionality include:

- Intuitive operation with simple menu options
- Easy importing of any Microsoft Office document: Word, PPT, Excel, Pic, and TXT
- Annotation capabilities on any file
- Three realistic writing modes
- Tool setting customization
- Multiple color options
- Supports multimedia content files
- Easy exporting in multiple file types
- Simultaneously captures all onscreen content, including speech and gestures
- Document camera support
