

ViewBoard® for Education Empowers Instructors

Challenge

Your interactive whiteboard software is due for an upgrade. You're looking for a solution that gives instructors the ability to easily create and deliver 21st century-worthy interactive multimedia presentations. Is there a solution that is as easy-to-use as it is powerful?

Solution

Packed with powerful yet intuitive-to-use teaching tools, ViewSonic® ViewBoard® for Education makes it easy to deliver more engaging and collaborative lessons. Instructors can enhance lessons with integrated course-oriented templates, subject-specific modes for English, math, chemistry, physics, sports & music, customizable backgrounds, and the ability to import virtually any type of document or media file. ViewSonic's two-finger hotkey delivers instant access to the simplified toolbar, enabling users to emphasize content in real time with onscreen highlighting and notes – including the ability to annotate directly onto the integrated web browser. Mind Map and Countdown Timer tools help educators organize presentations and create timed content such as quizzes and games. For the ultimate flexibility, ViewBoard lets teachers pre-record lessons or record live during class to save on-screen annotations, macros, media files and audio using the ViewSonic-exclusive record function – ideal for flipped classrooms, distance learning, absent students, test prep or general review. For Google-based classrooms, sharing content is easier than ever with ViewSonic's exclusive Direct to Google Drive Save – quickly accessible via the two-finger hotkey and activated by a tap of the cloud icon. Compatible with leading learning software, apps and all multimedia content files, ViewBoard for Education is ideal for demonstrating student- and teacher-created videos and supporting blended learning environments.

What you'll need for interactive presentations in Google-based classrooms:

► ViewBoard for Education software SW-020

- An easy, cost-effective Windows-based software solution to boost the performance of existing interactive whiteboard displays
- Software disc is included with ViewSonic CDE-T interactive flat panel displays, or available for purchase for use with existing interactive displays

► (Optional) A ViewSonic® CDE-T interactive flat panel display with ViewBoard Embedded software

- CDE5561T - 55" Full HD interactive touch
- CDE6561T - 65" Full HD interactive touch
- CDE7061T - 70" Full HD interactive touch
- CDE8452T - 84" Full HD interactive touch

► (Optional) A ViewSonic® slot-in PC

- NMP711-P10 - Network media player compatible with CDE5561T, CDE6561T, CDE7061T and CDE8452T
- NMP712-N - Network media player compatible with CDE5561T, CDE6561T, CDE7061T and CDE8452T
