

Seamless, Simplified Interactive Wireless Presentation with ViewSync® 3

Challenge

Effective meetings require effective interaction. You're looking to eliminate the hassles of wired connectivity and enhance collaboration with interactive wireless presentation, but you don't want to incur a high price tag or add new headaches. Is there an easy, cost-effective way to add this functionality for your meeting rooms?

Solution

The ViewSonic® ViewSync® 3 Wireless Presentation Gateway offers an easy, cost-conscious way to boost collaboration, add convenience and eliminate cord clutter. Delivering quick and easy 1080p content streaming to any projector or display from up to 60 devices, the slim gateway eliminates the need for cables, thereby speeding start-up time and facilitating smooth transitions. Simply plug the included AutoProject Key USB dongle into any laptop for instant connectivity and content sharing from participants' laptops, tablets and smartphones. Real-time annotation and screen interaction facilitate effective sharing while the Moderator Mode keeps things on track by enabling a moderator to preview and control content from all devices. Seamless with new installations as well as ideal with legacy (VGA/RCA) wiring, the ViewSync 3 facilitates HDMI connectivity without the costs and hassle of running an additional cable. Simply install the ViewSync 3 gateway at the projector and connect via the HDMI port to achieve seamless wireless presentations with the clarity of 1080p. Features include:

- Easy and instant projection with AutoProject™ Key
- Manage content from up to 60 connected devices
- Concurrent support for WiFi, Miracast, and DLNA
- Real-time annotation and screen interaction
- Dual band wireless support

What you'll need to add convenience and boost collaboration:

- ▶ A ViewSonic ViewSync 3 Wireless Presentation Gateway with included AutoProject™ Key
- ▶ A device with HDMI or VGA port for content streaming
 - ViewSonic Projector
 - ViewSonic Large Format Display
 - ViewSonic Monitor
- ▶ Mobile device for content sharing
 - Laptop
 - Tablet
 - Smartphone
- ▶ Available Apps from App Store or Google Play!
 - ViewMirroring (Android)
 - ViewMedia (Android / iOS)
