

ViewSign Solutions IMPRESS CLIENTS AND CUSTOMERS WITH A SEAMLESS SIGNING EXPERIENCE

Challenges

Paper-based services are inefficient to the point of frustration, especially in a digital economy where everything happens at the push of a button. Every moment a client or customer needs to wait when performing a transaction decreases satisfaction and increases frustration.

Unfortunately, implementing new document processing systems are usually extremely complex, time-consuming, and expensive. And adopting any new technology represents a significant hurdle for any organization.

Solution

ViewSonic® Pen Display and ViewSign® Professional

A variety of ViewSonic pen displays can make a huge difference to the customer experience. For a cost-effective system that implements paperless transactions, the PD0524 is an ideal counter-top solution that both accepts signatures and runs full-color ads when not in use.

For reviewing and signing long documents, the PD1013 allows a streamlined reading and signing process that can integrate with a connected monitor to review progress in real time.

Either option couples with ViewSign Professional's Viewsonic Kiosk feature to best manage user experience and security. Staff can control screen mirroring via picture-in-picture display at a scale that protects personal information from visual hacking.
