

ViewSonic Solutions for Adopting New EdTech **USING INTERACTIVE WHITEBOARDS TO EASILY MODERNIZE EDUCATION**

Challenges

Tech in a modern-day classroom can be difficult to implement. Those that become frustrated with EdTech will not use the technology to its fullest potential. In a worst-case scenario, a teacher might avoid using technology altogether in lieu of learning how to master it.

It is also often the case that management has a hard time updating and managing interactive flat panels (IFPs) in a clean systematic way. Poor management and poor teacher training can be devastating to a school's systems and counties who need to see a return on investment. With such a heavy investment on part of the education system it becomes necessary to face these issues head on and work towards a resolution.

ViewSonic® ViewBoard®

myViewBoard®

Solution

ViewSonic ViewBoard® and myViewBoard®

With an IFP and myViewBoard, the teacher can work with technology that is intuitive, easy to learn, and simple to control. Finally, teachers have a tool that not only encourages innovation but also enhances their own teaching methods and abilities.

For school systems worried about the integration of IFP's into the classroom, ViewSonic has a long history of success that speak to the effectiveness of our EdTech implementation.

Simultaneously, ViewSonic provides avenues and resources for further teacher training via the Finch Academy and myViewBoard's YouTube channel. Both of these resources help teachers grow more confident while implementing these new EdTech tools into their classrooms.
