

ViewSonic Solutions for Creating Shareable Lessons **PROVIDING THE TOOLS TO CREATE AND SHARE LESSONS**

Challenges

Many teachers design their own teaching materials when preparing for a class. However, the work they put into making these valuable lessons might all be lost if there is no reliable way to share information between teachers and faculty.

With many older teachers leaving or retiring from the school system, experience and knowledge learned over long careers has the potential to be lost or forgotten. Vast amounts of teaching materials remain offline in books, handouts, and worksheets which limits what can be passed on.

myViewBoard®

Solution

myViewBoard®

With myViewBoard teachers can record, save, and search for materials to use themselves. Or colleagues can share their resources with other teachers. This saves preparation time and gives teachers the chance to try out new and unique teaching styles they might not be familiar with. Furthermore, myViewBoard makes reviewing, editing, or collaborating with other teachers easy.

Once material has been added to the digital whiteboard it immediately becomes Internet ready and is interactive by nature. Digital materials are especially useful after being uploaded to the cloud. There they can be pooled and distributed between large groups of teachers.
