Challenges

CHALLENGES

Many schools are out of touch when it comes to EdTech. They miss out on cutting edge technology and instead opting for out-of-date tools like blackboards or whiteboards.

Also, many teachers lack the training needed to effectively use and integrate EdTech tools into the classroom. EdTech is too often viewed as cumbersome and ineffective by teachers when it ought to be considered an essential tool. At the same time, the IT management of EdTech is viewed as a hassle that lacks systematic management.
