

ViewSonic Solutions for Inspiring Student Collaboration STUDENTS AND TEACHERS CAN WORK TOGETHER USING THE LATEST EDTECH

Challenges

Every student learns differently, and every learning method has different levels of effectiveness. One learning method that offers a unique take on classroom learning is kinesthetic learning or tactile learning.

Kinesthetic learning involves physical activity and can be better for students who have a hard time sitting still for long periods of time. Furthermore, many students lose interest, quickly get distracted by their environments, or simply can't perform at their best when asked to sit and listen to a lecture. They often respond best to direct interaction with the lesson in a more physical way.

ViewSonic® ViewBoard®

myViewBoard®

Solution

ViewSonic ViewBoard® and myViewBoard®

Utilizing ViewBoard and myViewBoard in education means directly interacting with lesson materials and the Internet in a way that allows you to manipulate, draw, annotate, write, and reorganize class materials. This tactical style of learning keeps learning active and engaging and doesn't confine students to their seat.

With ViewSonic's ViewBoard students are easily able to get up, move around, and get active. With access to tools like drawing and interactive quizzes all at a teacher's fingertips, it is easy to transform a group of unfocused students into an engaged class.
