

# ViewSonic Solutions to Prepare for the Future NEXT-GENERATION DISPLAYS GIVE PRACTICAL EXPERIENCE IN EMERGING TECH

## Challenges

Many schools are behind the times when it comes to introducing new and modern technologies into the classroom. This puts educators at a disadvantage when learning how to handle new technology, especially the distractions of personal devices.

In the future, most jobs will require a fundamental knowledge of technology, so it is important for teachers to also have a familiarity with new and emerging tech. As it stands today many teachers struggle to adopt new EdTech.

ViewSonic® ViewBoard®

myViewBoard®

## Solution

### ViewSonic ViewBoard® and myViewBoard®

ViewSonic's ViewBoard and myViewBoard are the next generation in EdTech, replacing the functionality of a projector, whiteboard, and classroom computer.

Computers, touchscreen monitors, tablets, and cell phones are all compatible with the ViewBoard and myViewBoard. In addition, these devices serve as a great entry point for young learners who are just being introduced to touchscreen interfaces. A ViewBoard's intuitive design, interactivity, and large size make it the ideal way to learn about technology in the classroom.

Alternatively, students already familiar with touchscreens on personal devices will find ViewBoard hardware and myViewBoard software excellent entry points into technological fields. The interface is also a great way to re-focus students' attention on a shared display for improved engagement and academic performance.
