VSPF2150 - 21.5 INCH PRIVACY FILTER SCREEN PROTECTOR FOR WIDESCREEN 16:9 MONITORS WITH ANTI-GLARE AND ANTI-SCRATCH

Key **Features**

- For 21.5" Displays
- Industry standard 60-degree viewing angles
- Anti-glare, anti-reflective surface
- Durable design

Product **Description**

Protecting confidential information from unauthorized viewing is crucial for businesses, government institutions, and consumers alike. The ViewSonic® Privacy Filter Screen Protector powered by Tech Armor™ keeps sensitive and confidential data on your screen from being visually compromised, without sacrificing front-of-screen performance. The Privacy Filter Screen Protector maintains a clear view directly in front of your screen, while blocking visibility when the screen is viewed from a side angle. In addition, the anti-glare coating on the Privacy Filter Screen Protector helps to reduce eye strain while increasing work productivity.
