

VOT132-S

Key Features

Product Description

*** This product has been replaced by [VOT133](#).**

OVERVIEW

Built with the latest Windows® 7 Home Premium OS and Intel® Atom™ 330 Dual Core processor and nVIDIA ION GPU, the ViewSonic VOT132 is ideal for surfing the web, setting up an entertainment hub or home office computing. Save desktop space by attaching the PC Mini to your VESA® ready monitor or use the included trim desktop stand. The eco-friendly design uses up to 80% less energy consumption than standard PCs. ViewSonic PC Mini's are the smart choice to work, play and connect virtually anywhere.

KEY FEATURES:

- Intel® Atom™ 330 processor with 2GB memory for efficient computing
- nVIDIA MPC7A-10N ION for 1080p playback
- 320GB SATA Hard Drive
-  • 802.11 b/g/n Wi-Fi connectivity
- High speed USB 2.0 (x6) back and front locations for easy connecting for peripherals with 5-in-1 Media Card Reader
- Windows 7 Home Premium OS Installed
- VESA® mounting bracket included - Attach to the back of your display
- Green - centric compact design uses less power, cables and plastic

LEARN MORE

VERSATILE CONNECTIVITY & INPUTS

In addition to the all-digital HDMI and DVI outputs and convenient 5-in-1 memory card reader, the ViewSonic VOT132 PC mini comes with six USB 2.0 ports (two on the front panel, four on the back) for keyboards, mice, storage devices, card readers, joysticks, digital cameras and anything USB. We know you like good music, so we gave the VOT132 the S/PDIF high-end sound output through coaxial cable and fiber optics

SPACE SAVING DESIGN

The VOT132 PC mini is just about half the size of a sheet of paper. It takes up very little desk real-estate and can be installed behind ViewSonic flat-panel monitors (or other VESA-compliant models) with the VESA mounting kit. Of course, you can also stand it up next to your ViewSonic monitor to show everyone how smart and eco-friendly you are.

EXPAND & BURN

If there's always a need to burn CD or DVD discs, you may want to add the optional VDD-100 8x DVD Super Multi drive module to your VOT132. The optional module has a matching exterior and can be attached to the VOT132 via magnetic contacts for an all-in-one look. It's convenient and it takes up no additional desk space

NVIDIA ION - BIG GRAPHICS, SMALL FORM FACTOR

NVIDIA® ION™ graphics processors turn up the visuals on compact, low-power PCs with performance up to 10X faster than similar systems. When combined with a low-power CPU like an Intel Atom, ION graphics processors transforms the PC into a premium experience. Key features include: Full 1080p HD video with true-fidelity 7.1 audio, Premium DirectX 10 graphics and a premium Windows experience with Windows 7

WINDOWS® 7 HOME PREMIUM INSTALLED

Microsoft's new Windows 7 OS boasts tons of new features designed to simplify everyday tasks, work the way you want it to work and make new possibilities in just a click's reach. "Your PC, simplified."

INTEL ATOM PROCESSOR

The Intel® Atom™ 330 is an efficient low power-using dual core processor that is still solid on performance. Utilizing Intel® Hyper-Threading Technology, Intel® Atom™ processors optimize performance in small form factor devices even when running multiple, resource hungry applications

GREEN CENTRIC

The green energy-saving design makes the PC mini VOT132 quieter than a notebook and is one of the coolest running desktops. Running on the Intel Atom processor requires less power usage. Eliminating the need for a bulky tower PC saves plastic. ViewSonic designs PCs that are also easy to recycle

PRODUCT SPECIFICATIONS

- Dimensions (WxHxD): 7.48" x 0.98" x 5.32" (190mm x 135mm x 24mm)
- Weight
 - Net: 0.99 lb. (0.5 kg)
 - Gross: 3.1 lb. (1.4 kg)
