IFP62 Series

# INTUITIVE TOUCHSCREENS

## Easy collaboration with PCAP technology.

Taking notes, capturing ideas and sharing concepts during brainstorming sessions can be difficult without the proper tools. Collaboration shouldn't be clunky; it should be intuitive.

With ViewSonic® ViewBoard® IFP62 series interactive displays, it's easy to share ideas, take notes, and distribute information to your team with just a few gestures of your pen or finger. **A premium, state-of-the-art design features a bezel-less PCAP (projected capacitive) touchscreen with incredible 4K Ultra HD resolution that makes meetings more productive and collaboration seamless.**

### PROJECTED CAPACITIVE TOUCH

Familiar and intuitive touchscreen (like a giant iPad) helps boost attention, enthusiasm, and engagement for the presenter and participants.

### HIGH ACCURACY AND RESPONSIVENESS

Interactive screen provides an incredibly natural and smooth handwriting experience.

### INTERACTIVE TEAMWORK

For truly collaborative discussions, multiple users can simultaneously write or draw on the huge ViewBoard panel using fingers, styluses or both.

### OPTIONAL ACTIVE STYLUS PEN

Easy-to-use stylus pen (VB-PEN-003) with rechargeable battery delivers precise writing.
