

# TEACH SMARTER, NOT HARDER

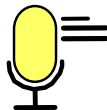

## Better Digital Whiteboarding Software for Your Classroom

Designed by teachers, for teachers and trusted by over 10 million educators and students around the world, ViewSonic® myViewBoard® software is an easy-to-use, easy-to-learn digital whiteboarding solution.

Compared to SMART Notebook software\*, myViewBoard delivers a more complete digital whiteboarding solution and enables teachers to reuse and leverage years of existing lessons without any lost content. In fact, SMART Notebook files can be instantly converted to ViewSonic's Open Learning Format for use across our entire education ecosystem.

**In addition, myViewBoard software provides several more intelligent and useful features not available with SMART Notebook:**

- Import existing lesson plans and files such as Google Slides, Microsoft PowerPoint, and .flipchart, individually or in bulk, from other platforms.
- Import Google Slides and PowerPoint presentations as manipulatives and edit everything - text, images, shapes - directly on the canvas.
- Save files to cloud storage such as Google Drive, OneDrive, Drop Box and more.
- Safe and curated YouTube search.
- Live Caption and Immersive Reader functions work with 20 different languages, including French Canadian.
- The ViewSonic Educator Community is FREE and open to all educators, while the SMART teacher community requires certification before access is granted.
