

COLLABORATIVE MEETING SPACES

Re-entering the workspace presents a unique journey for each company. Let the ViewSonic® Envision solution guide you along your own path. **With ViewSonic Envision, we'll consult with your team, work with your preferred integrators, and craft a custom-tailored solution that is right for your needs and budget.**

Creating a collaborative and productive workspace for your employees requires seeing your office through a new lens. We have the expertise and solutions to help you see new possibilities.

CONFERENCE ROOMS: We offer a variety technologies for your meeting room needs. These include ViewBoard® interactive flat panels, laser and LED projectors, and non-touch large format displays.

HUDDLE SPACES: Our ViewBoard® interactive displays are available in a range of sizes – making them an ideal fit for wherever you collaborate.

Additionally, our myViewBoard™ software paired with an interactive display makes it easier for your team to share and brainstorm with each other—whether they are collaborating in a huddle space or remotely. The myViewBoard app also makes it easy to join meetings from any location using your mobile phone or tablet.

REMOTE CONFERRING: With a 43" high-accuracy in-cell touchscreen and convenient USB-C connectivity, our ViewBoard IFP4320 display delivers a smooth handwriting and annotation experience ideal for remote workers who still need to interact with people in the office.

COLLABORATION ON-THE-GO: Our portable touch displays are powerhouses of productivity wherever and whenever you need them. Compact and lightweight, they're easy to pack alongside your laptop, while USB-C connectivity delivers single-cable plug-and-play. Just plug a portable touch display into your laptop and you can remotely join meetings and interact with colleagues.
