

WHERE STUDENTS PLAY TO LEARN

Esports Lab

Esports labs are larger areas designed for students and players interested in engaging with all aspects of competitive gaming - from broadcasting and STEM to video game design to business.

Although smaller than an arena, esports labs are versatile enough to host competitive events and educate a large number of students.

Equip students to develop their very own games with a 32" ViewSonic® ELITE™ XG320U gaming monitor, hold the attention of players and classes alike with an 86" ViewBoard® IFP8650 interactive display and let players experiment with new strategies with a 25" XG250 gaming monitor.

Make esports labs a place for students to play, learn and grow with ViewSonic.
