Bring Your Office Workspace Home
ViewSonic Interactive Home Office Hub

You've been productive with your new work-from-home setup, but you miss the collaborative capabilities of the digital whiteboard back at the office. With the ViewSonic® TD2455 touch display and CDE 4K wall-mounted commercial display solution, you can now replicate that collaborative workspace environment at home.

With responsive in-cell capacitive touch technology, an advanced ergonomic design, and 24" touchscreen, the TD2455 delivers easy touch annotation that is more intuitive to use than a keyboard and mouse. When combining the TD2455 with either our 43" or 55" CDE 4K commercial displays, you can transform your home office into an interactive communications hub for boosted productivity and better collaboration—for less cost than a standard digital whiteboard setup.

• **See the big picture:** Large commercial displays enable you to see more content, work more efficiently, and collaborate more effectively.

• **Interactive meetings:** The TD2455 touchscreen enables you to annotate onscreen, write notes, and draw figures, as well as save and share for easier communication.

• **Open Collaboration:** In addition to ViewSonic® myViewBoard™ annotation software, you can also use other annotation solutions such as Microsoft Ink, Paint, PowerPoint, and more.

• **Easy-to-connect, easy-to-use:** The TD2455 features integrated USB-C for easy connection to a laptop/PC, while an integrated DisplayPort enables simple daisy chaining of the CDE 4K commercial display.
