

LED PROJECTORS: THE BRIGHT CHOICE

Enlightened projection with the ViewSonic LS500W and LS600W

If you're struggling to choose between lamp-based projectors, laser projectors and LED projectors, you shouldn't be. **The ViewSonic® LS500W and LS600W LED projectors are the bright and versatile projection choice for both education and business environments.** These high brightness projectors deliver amazing colors and incredible light source life for long-term, virtually maintenance-free usage for any classroom or conference room.

When compared to other lamp-based and laser projectors, the LS500W and LS600W LED projectors provide:

- Bright whites, vivid reds, rich greens, vibrant yellows, incredible browns and purples, natural skin tones
- Wide color gamut with 125% Rec. 709 color accuracy
- Up to 3,000 ANSI lumens
- Eco friendly and Mercury-free
- Maintenance-free lifespan of up to 30,000 hours*
- Easy installation with 360-degree orientation
- LED is a more affordable option
- Consistent image quality over time
- Low operational temperature with a quiet fan
