

## **ViewSonic Highlights its Commercial Display Line for Meeting Spaces and Conference Rooms at InfoComm 2026**

*The CDE31 and CDEG3 Series of Commercial Displays are Easily Integrated into Larger ProAV Ecosystems, Feature Fast Start-Up Times, and Can be Easily Managed by IT Teams*

**LAS VEGAS (June 18, 2026) InfoComm 2026 – Booth C7010** – [ViewSonic](#) Corp., a leading global provider of visual and edtech solutions, presents its CDE31 and CDEG3 series of commercial displays at [InfoComm 2026](#) in Las Vegas, NV, June 17-19, 2026. Designed and engineered to streamline installations and simplify IT management, these commercial displays are ideal for conference rooms, meeting spaces, and other environments where efficiency from a fast set-up and a quick-start Warm Boot function (<10 seconds) are needed.

The ViewSonic® CDE31 series of commercial displays are All-in-One solutions that can power advanced display experiences, deliver immersive lessons, and extend eye-catching retail experiences straight from the box. The quick startup and a secure, open Android™ platform provide smooth, PC-free content playback for lightning-fast presentations or 24/7 signage messaging. The built-in ViewSonic AirSync™ screen casting and sharing software allows up to four users to share their screens wirelessly, while the USB-C cable carries power, 4K video, and data to eliminate cable clutter.

The CDEG3 series of commercial displays features an OS-free architecture that eliminates pre-installed apps and services, ensuring that they minimize its software attack surface and enables complete disabling of hardware interfaces (RS232, LAN) when required. Built for 24/7 use in various environments, these displays have native 4K UHD resolution, 500-nit brightness, and flexible USB-C connectivity for seamless BYOD integration and Pro AV deployments. With its quick startup design and low-maintenance operation—backed by EPEAT Gold certification—the CDEG3 supports secure, uninterrupted collaboration.

“Both the ViewSonic CDE31 and CDEG3 series of commercial displays are built for 24/7 performance and designed to help prepare your organization for future display needs,” said Jeff Muto, Business Line Director at ViewSonic. “The CDE31 series features an open and secure Android platform, while the CDEG3 series is an OS-free solution with enterprise-grade components and a streamlined architecture that reduces cybersecurity risks. Both displays offer a variety of features,

including local and remote display management, certified AV control system interoperability, USB-C connectivity, and wireless casting.”

## COMMERCIAL DISPLAY SOLUTIONS

### CDE31 Series

- Native 4K UHD resolution for detailed graphics, crisp text, and lifelike video in landscape or portrait orientation; 500nits of brightness and 24/7 reliability
- Offers landscape or portrait mode flexibility
- Quick-Start Warm Boot (<10 seconds) so presentations and signage can start up immediately
- Powerful secured embedded platform; Android AOSP with the newest security patches, app compatibility, and open platform for custom integration
- One cable USB-C convenience with 65W USB-C delivers video, data, and power
- Picture-in-Picture (PIP) and Picture-by-Picture (PBP) options allow up to two independent sources to run at the same time
- Certified with AppSpace, Navori, and other CMS software so external media players are not needed
- Universal BYOD compatibility to connect with any laptop, mini-PC, media player, or OPS module (65-inch and larger only) without ecosystem lock-in
- All-in-one connectivity & management with ViewSonic Manager™, AirSync wireless casting, USB media playback, and 3.5mm audio I/O
- Comes in sizes from 43- to 98-inches

### CDEG3 Series

- An OS-free architecture with zero pre-installed apps, no ability to install apps, reducing attack surface and meeting strict security mandates for enhanced cybersecurity
- Native 4K UHD resolution, 500-nit brightness, and 24/7 reliability
- Quick-Start Cold Boot (<7 seconds) for quick startup
- Universal BYOD compatibility to connect with any laptop, mini-PC, or media player without ecosystem lock-in
- IT-friendly maintenance as there is no resident Operating System
- Enterprise-grade reliability with commercial-grade components, metal-back chassis, and industry-leading warranty for round-the-clock uptime
- Comes in sizes from 43- to 98-inches
