

**Snip.  
Share.  
Spark.**

**Real-Time Teaching  
with ClassSwift™**

Got a teaching moment? ClassSwift lets you **snip** anything on your screen. Then, instantly **share** it with students' devices for real-time interaction. This **sparks** engagement through live feedback and participation. With seamless ViewBoard integration and AI-powered insights, ClassSwift creates a smarter, more connected, and more interactive classroom experience that adapts to any teaching style or setup.

#### Cross-Platform Compatibility

Teacher devices run on Windows (Mac and Android coming soon). Students can join from any internet-connected device with a browser.

#### Student-Centered Design

Enables real-time feedback, annotation, and participation.

#### Teacher-Friendly Simplicity

With its click-click-drag interface, there's no steep learning curve—just intuitive teaching tools that work.

#### Real-Time Student Insight

Gain AI-powered analytics and visibility into student participation, comprehension, and engagement to personalize instruction on the fly.

#### One Connected Ecosystem

Runs on any Windows device and perfectly complements ViewSonic's hardware, software, and services—delivering a seamless, unified teaching experience.

#### Instant Delivery

Capture and share content in seconds.

#### Gamified Learning Tools

Use point reward systems, buzzers, and dynamic timers to make lessons more fun and motivate students to participate actively.

#### Comprehensive Classroom Management

The ClassSwift Hub allows you to access detailed assessments, attendance, and participation reports to inform teaching strategies.

#### Flexible Response Options

Engage students through multiple-choice, true/false, audio, and sketch responses to accommodate diverse learning preferences.

#### Easy Access for Students

Students can join classes using QR codes, weblinks, or common rostering tools for easy management and easy access for teachers and students.

**Whether you're teaching in person, remotely, or in a hybrid setting, ClassSwift adapts to your instructional flow, making interactive learning feel natural, intuitive, and engaging.**
