Product **Description**

The 27" VX2779 gaming monitor gives you the size to see more of the game and the speed to stay ahead of it. A 240Hz refresh rate and 1ms (MPRT) response time make sure that bigger view never holds you back, keeping fast-action scenes fluid and responsive when the pressure peaks. AMD FreeSync™ and NVIDIA G-SYNC® Compatibility build on that foundation, keeping your GPU and monitor in sync to wipe out tearing and stutter. HDR10 takes it further still, drawing richer contrast and deeper color out of every scene on that larger screen. The 3-sided frameless design makes multi-monitor setups look as sharp as they perform, with two HDMI ports and one DisplayPort ready for every device in your rig.
