PJD8653WS-S

Key **Features**

Product **Description**

The ViewSonic PJD8653ws is a WXGA DLP ultra short throw projector that delivers large, widescreen, interactive presentations from a short distance. With an optional interactive package, the PJD8653ws supports dual interactive pens for collaborative teaching and turns any surface into an interactive whiteboard. Dual pens and the ViewDraw2 software allows two users to simultaneously write, draw, or annotate, making presentations more engaging than ever. With an ultra short throw lens, the PJD8653s is great for use in small areas with space constraints—it can project an 81" image from only 2 feet away. Built with BrilliantColor technology, this projector produces vibrant colors, while 3,000 ANSI lumens and 15,000:1 contrast ratio deliver sharp images. Equipped with Crestron LAN controller, the PJD8653ws makes it easy for IT admin to remotely control and manage multiple projectors from their workstations. Certified with AMX Device Discovery, the PJD8653ws easily integrates into any size campus or enterprise. In addition, the PJD8653ws is packed with advanced features including HDMI, two integrated 8-watt speakers, keystone correction, and DynamicEco. The PJD8653ws is the perfect projector to deliver large, wide-format images within small spaces in need of an interactive whiteboard feature.*
