SW-081

Key **Features**

- Simplified Content Creation
- Supports Common Media Formats
- Do-It-Yourself Digital Signage
- Eye-Catching and Informative Widgets
- Comprehensive Scheduling System

Product **Description**

ViewSonic Digital Signage just became easier and more accessible than ever with DisplayIt!Xpress. This software makes it easy to manage a signage network of any size from a single PC with an intuitive, user-friendly interface. Use PowerPoint or other familiar office applications to create new content, then simply drag-and-drop media files to build playlists within seconds. Update content with a single click over wired or wireless networks, shared folders, cloud storage or USB drive. Scheduling options for each playlist item ensure the right message at the right time. Add eye-catching widgets that include date, time, weather and scrolling text with RSS support. Creating, uploading and managing content just became as easy as 1-2-3.
