Product **Description**

Hiperwall specializes in software for highly interactive video walls. From control rooms to research centers, organizations around the world use Hiperwall Software for their critical collaborative visualization needs. Designed to facilitate critical decision making, this flexible software is perfect for any interactive video wall from the smallest to the most complex. We provide software applications that manage the input, control and output of a video wall system. We also provide a powerful solution for sharing and collaboration among systems. The Hiperwall HiperSource License provides interchangeable applications (Sender, Streamer, IP Streams, Browser) that deliver live content to a video wall. One application per license.
