NMP250-WL-S

Key **Features**

Product **Description**

The Solstice Pod is a turnkey solution that easily connects to a ViewSonic® display or projector and enables multiple users to simultaneously share content from a range of devices (laptops, tablets, or smartphones). With a Solstice-enabled display or projector in the room, a number of users can instantly connect, share, and control content on the display or projector to better facilitate presentations, collaboration, and decision-making. The Solstice Pod may be used within an existing network infrastructure, or may be deployed as a standalone wireless access point (WAP) for those organizations wanting to isolate use of the displays from their IT networks.

Specifications

More Information
