

LD-STND-006

Key Features

- Extra-large caster wheels give you the flexibility to create a stationary or mobile setup with your LDP135-151 Direct View LED display. These reinforced wheels provide greater stability during transport or lock in place depending on your needs.
- With an enhanced modular design, the LD-STND-006 cart streamlines setup to help businesses save both time and money.
- This minimalist stand integrates seamlessly with the LDP-135-151 Direct View LED display, creating an elegant and sophisticated digital signage centerpiece for both offices and classrooms.

Product Description

Take show-stopping messaging on-the-go with the ViewSonic® LD-STND-006 mobile cart. This versatile, ultra slim cart was designed specifically for the LDP135-151 135" All-in-One Direct View LED Display and functions as both a mobile and stationary stand.

Extra-large caster wheels lock in place for powerful stability and serve as shock absorbers for greater support during transportation. With the LD-STND-006, system integrators can cut down on installation time by quickly and easily mounting a LDP135-151 Direct View LED display directly onto the cart.
