

Seamlessly Upgrade Hospitality Venues with ViewSonic All-in-One LED Displays

Challenge

Upgrading audiovisual equipment is crucial for hospitality venues to remain competitive and ensure high-quality guest experiences. However, they often face high costs and operational challenges when retrofitting advanced technologies into existing infrastructures. Traditional LED display installations—a common choice—typically require extensive interior modifications, compatibility checks with existing systems, and complex configurations, leading to significant downtimes and substantial financial losses. Additionally, the need for expert installers and specialized operators can lead to further hidden costs.

Solution

ViewSonic's All-in-One LED displays integrate all systems into a sleek, compact control box, eliminating the technical hassles and space constraints typical of traditional solutions. The mobile, pre-assembled LDS Series facilitates seamless upgrades without room rearrangement or downtime and can be set up by two staff members in just 10 minutes—no technical expertise required. It features a motorized stand and a 135" foldable screen that fits into passenger elevators for easy transport. Additionally, the customizable LDC Series offers configurations up to 760" in various shapes and aspect ratios, perfect for retrofitting, while the pre-configured LDM and LDP Series deliver streamlined 16:9 setups in multiple sizes.

Explore ViewSonic All-in-One LED Displays

Foldable LDS Series

- ▶ 135" foldable screen
- ▶ Setup in 10 minutes
- ▶ Built-in mobile stand

Customizable LDC Series

- ▶ Up to 760"
- ▶ Flexible sizing
- ▶ GOB surface treatment

Standard LDM & LDP Series

- ▶ 136"/163"/231"
- ▶ Pre-configured in 16:9
- ▶ GOB surface treatment
