About ViewSonic

For nearly four decades, ViewSonic has been a trusted leader in display solutions.

ViewSonic helps businesses boost productivity and streamline operations across every workspace, including lobbies, conference rooms, executive offices, and large auditoriums. Our innovative hardware and software solutions drive success in industries such as finance, healthcare, manufacturing, and retail. With expert technical support, we provide the performance and peace of mind organisations need to work with confidence.

ViewSonic Business Ecosystem

Every business has unique needs. ViewSonic solutions are designed and built to effectively address the challenges businesses face every day. With an expansive portfolio including ViewBoard interactive displays, All-in-One LED displays, non-touch commercial displays, projectors, monitors, and specialist software, ViewSonic is your one-stop-shop for complete business solutions.

myViewBoard®

Why Choose ViewSonic?

We understand that successful technology integration requires comprehensive support to maximise your investment. That's why we offer a comprehensive range of post-purchase services to support your business, including:

Warranties: Enjoy peace of mind with warranties of up to 5 years on select products.

Built-in Software: Our displays come with a range of software, including myViewBoard for digital whiteboarding, AirSync for wireless casting and Manager for remote device management.

Professional Training: Ongoing training and technical support from ViewSonic's experienced team.

Strong Partnerships

ViewSonic is a trusted partner of leading technology brands, delivering integrated solutions that drive collaboration, enhance productivity, and support modern business needs.

Compliance and Certification

ViewSonic is committed to sustainability and responsible innovation, designing products that meet strict environmental and safety standards to support greener practices and ensure global compliance across industries. A recycling scheme is also available to help dispose of old tech.

All-in-One LED Displays

With larger-than-life images, ViewSonic Direct View LED displays make a sizable impression in any boardroom, lobby, training room, and more. They boast seamless and stunning video wall images in up to 4K resolution for enhanced detail. An advanced Glue-on-Board (GOB) surface treatment with an LED IP54 rating and impact resistance makes these robust displays ideal for public spaces.

LDS Series

Foldable and Mobile Video Wall on Wheels

Need flexibility on the move? The LDS138-151 mobile display brings Direct View LED technology to any space with ease. Featuring a foldable 138" screen, GOB surface protection, and a robust, height-adjustable stand, it's perfect for dynamic presentations and portable digital signage in corporate and educational settings. Simply roll it in, unfold, and power on.

- **Easy Setup:** Experience effortless setup in just minutes, no wall mounting or complex installation needed. Simply unfold, plug into a standard 20-amp outlet, and you're ready to impress with vibrant visuals anywhere.
- **Mobile and Foldable:** This display effortlessly glides between classrooms, event spaces, and meeting rooms with smooth, 360-degree silent wheels. Its innovative foldable design enables the display to fit into large passenger elevators, while an included flight case provides secure protection during transport between venues.
- **Durable and Reliable:** A commercial-grade motorised stand and patent-pending hinge design provide enhanced stability, even with heavy usage. Glue-on-Board (GOB) technology offers incredible surface protection with IP54-rated dust and moisture resistance and impact resistance.
- **Integrated Control Bar:** A user-friendly control bar is built into the floor stand, maximising the screen area and keeping the display front clean and uncluttered.

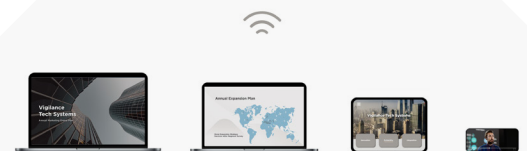

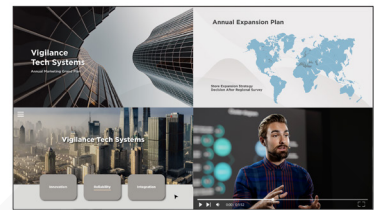

LDM Series

Pre-Configured, All-in-One Simplicity

Say goodbye to complicated installs and hello to streamlined setup. The ViewSonic LDM series offers all-in-one Direct View LED displays with exceptional picture quality, various size options, and easy installation, all at a more accessible price point. Ideal for corporate boardrooms and lobbies, these displays combine visual excellence with practical usability.

- **Immersive Screen Sizes:** Choose from 136", 163", and 231" options.
- **Flexible, Hassle-Free Installation:** A modular, user-friendly design ensures quick and easy setup. The system control bar comes pre-attached to the bottom of the display for standard installation. Optional accessory kits are available for hidden or separate installations.
- **Durable Design:** Glue-on-Board (GOB) technology provides a protective shield that safeguards the LEDs during installation and daily use.
- **Easy Content Sharing:** Picture-by-Picture (up to 4 sources) and Picture-in-Picture capabilities offer dynamic collaboration. Built-in Wi-Fi and pre-installed vCast™ software allow for wireless content sharing from multiple devices.

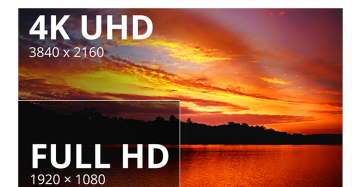

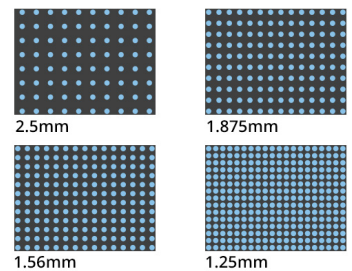

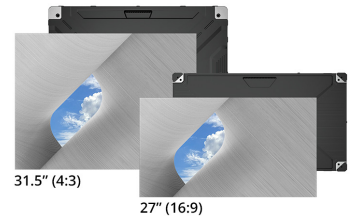

LDC Series

Configurable All-in-One Direct View LED Displays

The LDC series breaks free from traditional format constraints, allowing you to design the perfect video wall for your specific needs. Whether you require a unique aspect ratio or digital signage of extraordinary dimensions, the LDC series delivers.

- **Flexible Cabinet Size:** The LDC series lets you design a Direct View LED video wall perfectly tailored to your space. Every Direct View LED video wall is comprised of multiple LED tiles within an LED cabinet. Depending on your desired screen size and aspect ratio, the quantity of LED cabinets will vary.
- **Pixel Pitch:** Choose from four pixel pitch options: 1.2, 1.5, 1.8, and 2.5*, to design a video wall that delivers the optimal viewing experience for your space and audience. These pixel pitch variations cater to a range of viewing distances, ensuring stunning visuals no matter where viewers stand.
- **Resolutions:** Regardless of the shape, size and configuration of your video wall, rest assured that it will deliver amazingly vibrant and stunning images in 1080p, 4K and non-standard resolutions.
- **Tough and Reliable Glue-on-Board (GOB) Technology:** GOB surface treatment with IP54 and IK06 ratings protects against dust, moisture, and impact.
- **Trusted Partnership from Design to Post-Installation:** A ViewSonic expert will guide you through every step, from site evaluation and design, to product and spec recommendations, at no extra cost. We'll also verify site readiness and provide on-site supervision during installation.

*2.5 pixel pitch only available in 4:3 ratio

Commercial Displays

From entrance halls to boardrooms, our commercial displays streamline communication across workplaces. Available in sizes from 43" to 105" with brilliant 4K resolution, robust 24/7 operation, portrait and landscape orientation options, these displays are the ideal addition to any workspace.

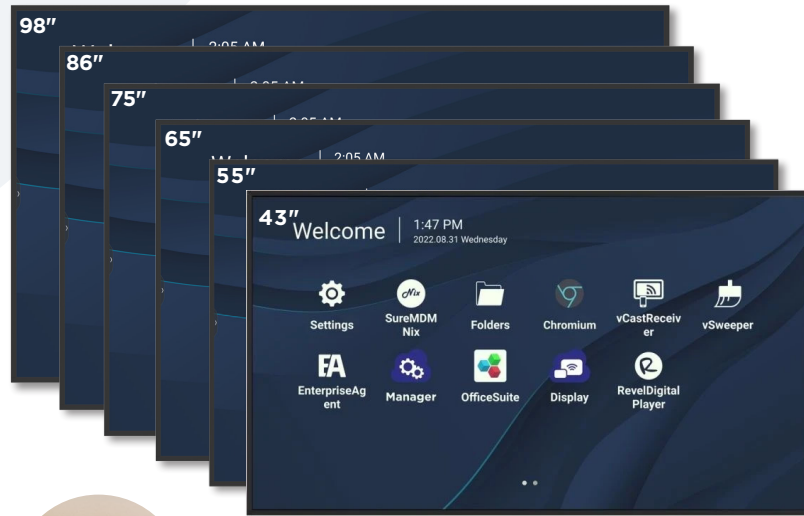

*Source: Futuresource Consulting, 2023 and 2024, excluding China

CDE30 Series

Versatile Presentation Display

With stunning 4K Ultra HD resolution, high brightness, and landscape and portrait modes, the CDE30 Series offers continuous and sustainable 24/7 communication.

- **Simple Set-up:** Power, video, and data through a single 65W cable to cut clutter and simplify setup.
- **AV Integration:** ProAV compatibility with Crestron, Extron, and AMX and, remote management through ViewSonic Manager software.
- **4K UHD Clarity:** Enjoy sharper text, vivid graphics, and life-like video in landscape or portrait mode with 25% high haze anti-glare glass and up to 500 nit brightness for brighter spaces.
- **24/7 Operation:** Commercial-grade design built for continuous, round-the-clock use.

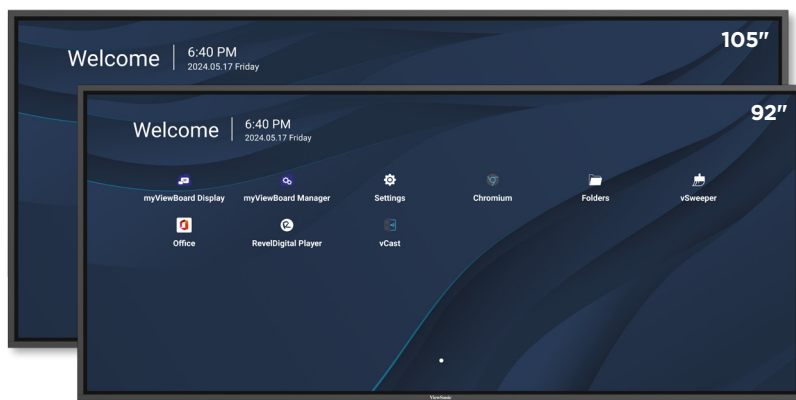

CDE Ultrawide Series

Expansive Display Perfect for Meeting Rooms

The CDE Ultrawide series available in 92" and 105" delivers an expansive canvas ideal for meeting rooms and conference spaces.

- **21:9 Aspect Ratio:** Optimised for Front Row and Gallery Mode in Microsoft Teams Rooms and Zoom, these displays foster inclusivity and streamline communication by enabling all participants to be seen and heard in hybrid meetings.
- **5K Ultra HD Resolution:** Native 5120 x 2160 resolution delivers over 11 million pixels for sharper and clearer visuals.
- **Integration with TeamJoin Solution:** Turn your collaboration space into a hybrid meeting room with the ViewSonic TeamJoin conferencing solution for Microsoft Teams that enables meetings to be started with just one touch.
- **Seamless Presentations:** Make multi-tasking easy by displaying webpages, documents and calls side-by-side and instantly share presentations via USB-C with 100W charging.

ePoster

Ideal for up-close, high-traffic environments, the ViewSonic 55" ePoster delivers vibrant 4K Ultra HD visuals that capture attention and communicate your message with clarity.

- **Flexible Display Options:** Available in both touch and non-touch models, the ePoster adapts easily to a variety of spaces, from retail spaces and restaurants to office lobbies and transport hubs.
- **Built for Demanding Environments:** Designed for durability, it features a scratch-resistant tempered glass faceplate and delivers consistent, high-quality performance even in busy settings.
- **Modern, Space-Saving Design:** With a slim, freestanding form factor, the ePoster integrates seamlessly into any environment without compromising visual impact.
- **Effortless Content Management:** Built-in media playback and compatibility with ProAV control systems enable easy, centralized management across multiple displays.

ViewBoard Interactive Displays

Ranked the world's #1 interactive display brand for two years running*, ViewSonic ViewBoards deliver stunning visuals and powerful collaboration tools that bring people together to share, create and learn. We provide solutions that fit every budget and space with sizes from 55" to 110", including Ultrawide series.

*Source: Futuresource Consulting, 2023 and 2024, excluding China

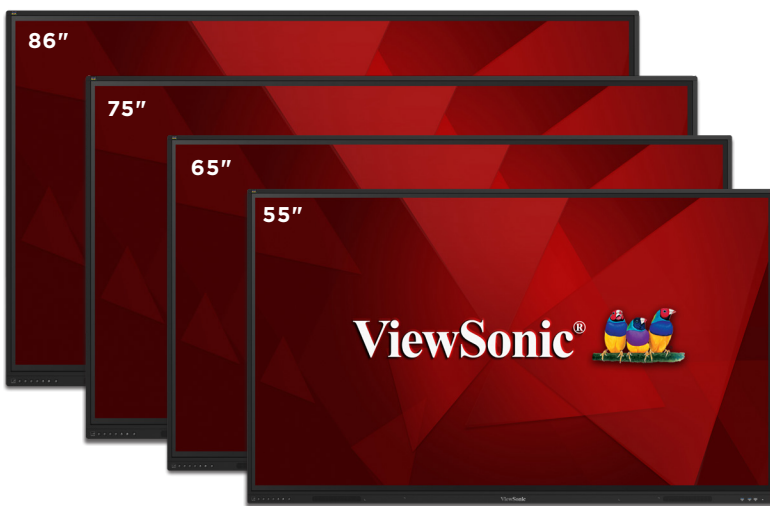

ViewBoard Ultrawide Series

Expansive Canvas for Collaboration

The ViewBoard Ultrawide series available in 92" and 105" delivers expansive collaborative canvases ideal for meeting rooms and conference spaces.

- **21:9 Aspect Ratio:** Optimised for Front Row and Gallery Mode in Microsoft Teams Rooms and Zoom, these displays foster inclusivity and streamline communication by enabling all participants to be seen and heard in hybrid meetings.
- **5K Ultra HD Resolution:** Native 5120 x 2160 resolution delivers over 11 million pixels for sharper and clearer visuals and 40-point touch for precise writing.
- **Integration with TeamJoin Solution:** Turn your collaboration space into a hybrid meeting room with the ViewSonic TeamJoin conferencing solution for Microsoft Teams that enables meetings to be started with just one touch.
- **Seamless Presentations:** Make multi-tasking easy by displaying webpages, documents and calls side-by-side and instantly share presentations via USB-C with 100W charging.

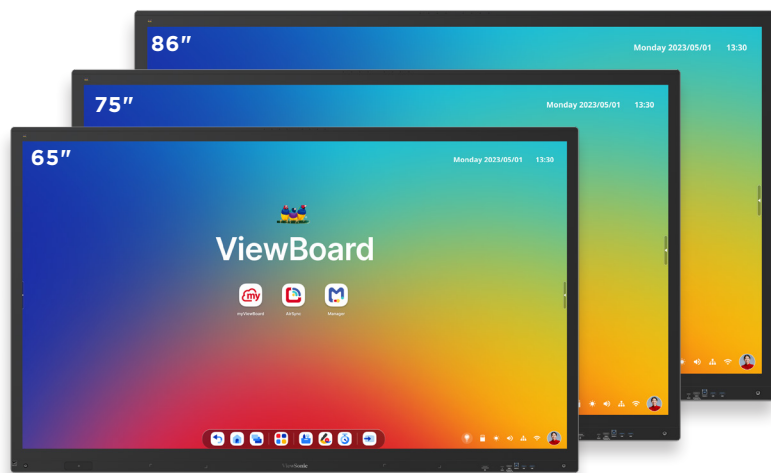

ViewBoard IFPG1 Series

Secure, OS-Free Display

For businesses that prioritise network security, the ViewBoard IFPG1 is ideal with its OS-free design that minimises cyber threats and safeguards user data.

- **OS-free Design:** Without a built-in OS, malware has nowhere to run, minimising the risk of cyberattacks.
- **Upgradable Framework:** Easily update your display with a Slot-in PC running an OS of your choosing.
- **Reduced Data Leaks:** No local data storage minimises the chances of data breaches.
- **Seamless Presentations:** Plug-and-play connectivity and fast 65W power charging, as well as accurate 40-point touch.

ViewBoard IFP63 Series

Ultra-precise EDLA-certified Display

The IFP63 series delivers powerful collaboration with ultra-responsive PCAP touch, robust enterprise software, and a sleek design. Built for modern meeting spaces, this series enables seamless presentations, real-time collaboration, and efficient hybrid teamwork.

- **Enterprise-Grade Security:** Android EDLA with auto updates, data encryption, and two-way authentication - plus full access to Microsoft 365 via Google Play Store.
- **PCAP Precision Touch:** Smooth, precise, multi-user interaction on a durable glass surface - ideal for fast-paced corporate environments.
- **NFC & Single Sign-On:** Swift and secure access to personalised dashboards and linked accounts, including Google, Microsoft, Apple and other cloud-based accounts.
- **Google Play Store Access:** Full access to all Google Play Store apps to customise your display and increase productivity.

ViewBoard IFP51 Series

Sustainable, EDLA-certified Display

Enhance team collaboration with the EDLA-certified IFP51 series equipped with instant access to Google and Microsoft 365 tools and improved energy efficiency, including EPEAT Gold and EnergyStar certifications.

- **Sustainable Solution:** Certified energy efficiency with Gold EPEAT, EnergyStar and RoHS certifications.
- **EDLA-certified:** Stay protected with built-in Google security, data encryption, and easy management tools that keep your network and devices safe, as well as access to Google and Microsoft apps.
- **NFC & Single Sign-On:** Swift and secure access to personalised dashboards and linked accounts, including Google, Microsoft, Apple and other cloud-based accounts.
- **Natural Writing Experience:** 50-point touch and the built-in WriteAway tool for instant annotation makes collaboration quick and simple. Images are also sharper with AI enhancement.

ViewBoard IFP110 Series

Showstopping Larger-than-Life Display

The IFP110 boasts an impressive 110" touchscreen with thin bezels and 4K Ultra HD resolution, making this series a stunning centerpiece for multipurpose rooms, boardrooms, libraries, and other large spaces.

- **Stunning Visuals:** 4K screen with 40-point touch delivers breathtaking larger-than-life images and seamless interactivity.
- **Simplified Set-up:** A 110" screen replaces four 55" touch displays in a 2x2 layout - translating to a simpler setup process and lower costs for calibration and maintenance.
- **NFC & Single Sign-On:** Swift and secure access to personalised dashboards and linked accounts, including Google, Microsoft, Apple and other cloud-based accounts.
- **Built-in OS:** Enjoy full use of Android 13 capabilities with a build-in OS.

TeamJoin

Videoconferencing Solution

Certified for Microsoft Teams Rooms, TeamJoin transforms any space into a hybrid meeting room with just one touch. Pair TeamJoin with an Ultrawide ViewBoard or CDE display to enjoy an expansive canvas for collaboration and split-screen mode for Microsoft Teams and Zoom calls.

The TeamJoin solution includes:

- **Computing Engine:** A nimble computing system with a 12th generation Intel Core i5 processor for enhanced productivity and collaboration. The processor also supports three HDMI v2.1 outputs and up to three displays.
- **Touch Control:** A compact 11.6" touch console with intuitive touch control and easy meeting scheduling.

- **4K Ultra HD Video Bar:** Bringing together a 4K camera with dual-lens panoramic, plus PTZ coverage and AI auto-framing with a 4-mic array with 8-metre range and 11W speakers.

Wyatt Davis

Hybrid Work Overview

Hybrid work has become the most popular flexible work arrangement for most companies. The best of both worlds allows employees to better balance their professional and personal lives.

Employees of this model are more likely to have higher job satisfaction and productivity. This also allows them to work a 4-day workweek, which can lead to better work-life balance and less burnout.

As more companies embrace the hybrid work model, it's likely that more employees will choose this flexible work arrangement.

Compressed Workweek

Employees work the standard 40 hours over a shorter period, typically 3 days. This allows them to spend more time with family and pursue other interests.

Part-Time Work

Employees work fewer than 40 hours per week. This allows them to balance work with other commitments, such as school or family care.

Analytics Chart

The analysis chart provides a comparison of several flexible work arrangements based on their frequency and effectiveness.

Chat

Last read

Wyatt Davis: I'll have sent you the project link via email. Please take a look at it when you are free. Thank you.

Sarah Lee: Sure!

Michael Brown: Thank you.

Flextime

Employees choose their start and end times within a set range, allowing them to work around their personal schedules.

Telecommuting

Employees work from home, either full-time or part-time. This allows them to avoid traffic and save on commuting costs.

Remote Work

Employees work from anywhere, not just from home. This allows them to travel and work remotely, providing more flexibility and autonomy.

Job Sharing

Two employees share a single full-time position. This allows them to combine their skills and experience to complete the job.

Types of Flexible Work Arrangements

A recent report showed that 27% of employees were now willing to give up some of their vacation days to gain flexible working options for work-life balance. Flexible work arrangements can increase an employee's productivity and engagement, which in turn can benefit the business.

Flexible work can also increase an employee's loyalty and retention, as it allows them to work on their own terms and schedule. This is especially true for parents and caregivers, who often need more flexibility to balance their work and family responsibilities.

Accessories

ViewSonic offers a wide range of accessories designed to tailor solutions to the unique needs of your workspace. From powerful slot-in PCs and motorised display stands to wireless casting kits and advanced conferencing cameras, ViewSonic accessories enhance functionality, simplify setup, and elevate the overall user experience across any business environment.

Slot-In PCs for ViewBoard Interactive and CDE Displays

Turbocharge your meeting room setup by easily adding an optional slot-in PC to your ViewBoard and CDE displays. From providing additional computing power to Google Play Store access, ViewSonic offers a full lineup of solutions, including Windows PCs, EDLA-certified options, and Linux.

Beyond Architecture:
Redefining the Business

ViewShare WPD-900 Wireless Casting Kit

Whether you're in a meeting or leading a conference, the ViewShare WPD-900 lets you present wirelessly with confidence. No complicated setup. No tech headaches. Just seamless sharing.

- **Instant Presentations:** Plug in and start casting instantly without the need for network setup, software installation or app downloads required. Works seamlessly with almost all mobile devices via Miracast and AirPlay.
- **Internet-Free and Wi-Fi-Free Connection:** Connect your devices directly to one another without needing the internet or a Wi-Fi router. This gives you a steadier, more secure connection and enables easy, peer-to-peer (P2P) seamless sharing.
- **Pass-Through Charging:** Charge your device while sharing your screen via the USB-C port on the dongle.
- **Long-Range Wireless Transmission:** Wirelessly cast content from up to 30 metres away, ideal for larger conference rooms, classrooms, or auditoriums.

Business Monitors

With easy setup and fast deployment, ViewSonic business monitors improve productivity and help lower total cost of ownership for your enterprise. Our diverse portfolio includes monitors with advanced connectivity options like Thunderbolt™, USB-C, and Ethernet, streamlining workstation setup, simplifying device management, and driving greater workplace efficiency.

Business Monitor Series

WorkPro Series

Advanced ergonomic features, future-proof connectivity options, and integrated docking stations in selected models make ViewSonic VG series monitors incredibly adaptable. Easy deployment, eco-friendly packaging and 5 years standard warranty help lower your total cost of ownership.

ColorPro Series

Ideal for executives, professional creatives, and more, ViewSonic® ColorPro® VP monitors deliver high resolutions and incredible colour accuracy for a optimum performance. With the latest range equipped with Thunderbolt connectivity enjoy lightning-fast data transfer and power delivery.

Touch Series

With innovative touch displays ranging from desktop and portable models, to front-of-room podium displays and wayfinding kiosks across your workspace, we offer a variety of interactive touchscreen options to fit your different needs.

Essential Series

Backed by the ViewSonic reputation for quality and reliability, these monitors deliver rock-solid dependability and outstanding performance at a great value, with a wide range of screen size available from 16" to 34".

WorkPro Series

Monitors Designed for Comfort and Productivity

With advanced ergonomic features, flexible display configurations, and future-proof connectivity options, ViewSonic® VG series monitors help to boost productivity, while easy deployment and eco-friendly packaging help to lower your total cost of ownership.

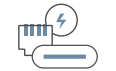

- **USB-C Docking Monitors:** With RJ45 wired Ethernet connection, a USB hub for your accessories, and USB-C single-cable connectivity with up to 100W power delivery, these monitors eliminate the need for expensive docking stations.
- **Versatile Connectivity:** With HDMI, DisplayPort, and USB hubs, these monitors deliver plug-and-play connectivity for whatever devices your business uses including PCs or laptops.
- **Reduced Environmental Footprint:** These monitors are shipped in environmentally friendly, biodegradable, paper-based packaging that cuts down on recycling costs and delivers a reduced environmental footprint.
- **Peace of mind:** The ViewSonic WorkPro monitor series comes with a standard 5 year warranty ensuring long-term reliability.

Advanced Ergonomics

USB-C with up to 100W Power

Software Solutions

ViewSonic's displays come with built-in software solutions to help you get the most out of your investment. ViewSonic software is designed to promote engagement, collaboration and teamwork and, streamline office operations.

Manager

ViewSonic Manager is an easy-to-use, web-based app that enables IT Departments to seamlessly monitor and maintain displays across their organisation from a single control panel. Key features include:

- **Urgent Alert Broadcast:** Send critical alerts to devices using ViewSonic and third-party integrations (no additional API or APK needed for integration), as well as display images, videos, and messages across multiple devices simultaneously for digital signage.
- **Cloud-Based Access:** Manage devices remotely from any web browser.
- **Easy Device Enrollment:** Quickly enroll devices using PINs, serial numbers, or QR codes.
- **Device Monitoring and Control:** Monitor and control devices 24/7 and schedule tasks from a central dashboard. Apps can also be installed, removed and, managed for all individual displays.

AirSync

Secure, wireless casting software that enables wirelessly screen mirroring from any device. AirSync also supports built-in casting like Miracast, Airplay, and Google Cast, making it easy to share content quickly and securely from any compatible device, including MacBook, iPad, Windows laptop and Android tablet. Key features include:

- **Flexible Casting:** Thanks to touchback control, you can manage casting to the meeting room display directly from a laptop or tablet (supports up to 10 devices).
- **Secure Moderator Mode:** Control the content on display by keeping up to six participants in a virtual waiting room before approving screen sharing.
- **Split-screen Mode:** Simultaneously show multiple screens of multiple devices on the main front-of-room display. This is great for collaboration and discussions.
- **Display Grouping:** Broadcast the main display across up to 10 large, networked screens for synchronised viewing.

myViewBoard

myViewBoard is a digital whiteboarding tool designed to promote engagement and collaboration through intuitive writing, drawing, video and polling tools. Key features include:

- **Infinite Canvas:** Brainstorm without limits with an infinitely expansive canvas.
- **QR Code Sharing:** Quickly and easily share your whiteboard content with team members via a QR code.
- **Interactive polling tools:** Get instant feedback from your team with instant polls and quizzes.
- **Multi-device Compatible:** Use myViewBoard on your interactive display and your personal device,
