

ViewSonic ViewPad 7x

Taking mobile tablet technology to the next level

Top View

Bottom View

ViewSonic's ViewPad 7x is an advanced 7" tablet that offers astonishing performance in a lightweight and portable package. Packed with Android™ 3.2 Honeycomb and the NVIDIA® Tegra™ 250 T20 1GHz dual-core processor, the ViewPad 7x takes your mobile multimedia experience to the next level.

Truly Mobile. Built-in DLNA technology, SRS TruMedia and Dual cameras make the ViewPad 7x a powerful multimedia device. The integrated Bluetooth, WiFi and HSPA+ (model specific) connectivity allow the ViewPad 7x to be the ultimate mobile companion allowing access to data anywhere at anytime.

Intelligent and aware. The ViewPad 7x includes all the sensors needed to make the device aware of its location and how it is being used. The integrated GPS is utilised by Google Maps and the pre-installed GPS Tuner software downloads maps that can be used for future use.

Unique luxury design. Accentuated by a injection moulded diamond-patterned back cover the ViewPad 7x is distinctive. Lightweight and durable the ViewPad 7x has amazing attention to detail and features discreet Micro HDMI and USB ports for external video support and connectivity.

Android™ 3.2 Honeycomb and Google Mobile Services (GMS). Using the latest Android Honeycomb technology the ViewPad 7x delivers the perfect Android experience. With access to 200,000+ applications via the Android Market the ViewPad 7x can switch seamlessly from being an e-reader, to reading mail, to acting as a navigation device or even controlling a PC at home.

ViewScene 3D. The ViewSonic customised user interface not only demonstrates the awesome power of the NVIDIA Tegra processor, but allows for an intuitive interface that enhances the Android Honeycomb experience. Offering up to 16 customisable panes, intelligent interactive grouping and multiple time zone support, ViewScene takes the ViewPad 7x to the next level.
