

ViewSonic

ViewPad 4

The smartest choice

ViewSonic
See the difference™

www.viewsoniceurope.com

The latest Android Experience that is ready for the future. Providing valuable compatibility with future Android applications, Google Android 'Gingerbread' is the new standard for innovative smart mobile devices. Google Android 'Gingerbread' provides the best combination of speed, versatility and media experience, from surfing the Web anywhere, to making crystal-clear phone calls or video conferencing via the dual cameras. The ViewPad 4 even supports HD video via the integrated mini HDMI output.

Large, high-definition, multi-touch screen with ViewSonic technology. The bright, crisp, high-resolution 4.1" display with responsive capacitive touch-screen, allows you to operate applications, read messages or play games quickly with the lightest of touches. Ideal for playing movies or seeing the fine detail captured with the integrated 5MP camera, the ViewPad 4 screen will allow you to really 'see the difference.'

Fast processor with ample space. The incredibly powerful 1GHz processor, integrated 512MB memory and a Micro SD slot supporting up to 32GB of additional memory provides plenty of computing power and abundant storage to carry more applications, personal data, images, electronic books, music and video.

Tablet versatility with phone convenience. It is now possible to have a single device that delivers full phone functionality with tablet capability when required. With full 3.5G compliance and integrated WiFi networking, 5-megapixel camera and a battery that lasts 400 hours in standby mode, the ViewPad 4 delivers when and where you need it.

Google Android certified device with ViewScene Software. The ViewPad 4 is a fully Google Android certified device and provides essential access to Android Market where over 200,000 applications can be downloaded and used along with Google Map, Mail and Navigation. The integrated ViewScene user interface, exclusive from ViewSonic can auto-detect where you are and what you want, automatically switching your home screen. In the office, home or travelling, each mode is customised to you.
