

# ViewSonic Adapts ViewBoards to Lessons at **MARIA-WAECHTLER-GYMNASIUM**

*All teachers who work with the ViewBoard, are happy about the new possibilities of advanced digital whiteboarding.*

Thorsten Korthaus, Headteacher  
**Maria-Waechtl-Gymnasium**

## Challenge

- Equip a digital test classroom.
- Offer a complete education solution.
- Support digital change school-wide.

[Go to Challenge >](#)

## Solution

- myViewBoard® software
- ViewBoard® IFP8680-2EP
- ViewBoard® Mini IFP2410

[Go to Solution >](#)

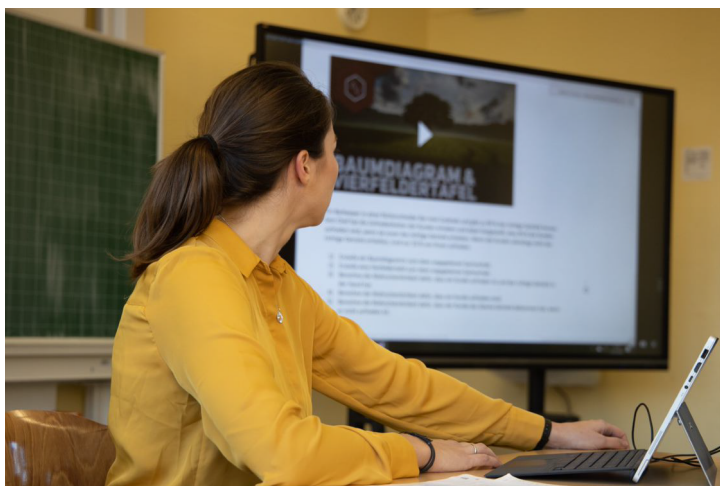

## Results

- Positive feedback from teachers.
- Easy integration of online content.
- Students enjoy the mobile connectivity

### **MARIA-WAECHTLER-GYMNASIUM**

The Maria-Waechtl Gymnasium is a bilingual high school in Essen, Germany. The state-owned Gymnasium is certified as a European School. It offers different language certificates and is focused on MINT subjects.

## Challenge

Marie-Waechtler-Gymnasium wants to digitalize its classrooms and is looking for the right solution. As a test, one of the classrooms will be equipped with digital technology. Based on the experience gained, a decision would be made on the equipment for the whole school.

### The school had specific goals in mind:

- Technology should follow the lessons and not vice versa.
- Every teacher must be able to work with the technology.
- Technology should not disrupt school life but rather make it better.

## Solution

Viewsonic equipped one of the classrooms with the powerful ViewSonic complete solution for digital teaching. This included a large-format touch display (ViewBoard), a small 24-inch touch display for the teacher's desk (ViewBoard Mini) and our GDPR-compliant software solution (myViewBoard). Interested teachers can use this room to gain experience with the system and teaching with the new technology.

### IFP8650-2EP

An 86-inch ViewBoard that offers UHD, a natural writing experience, and superior connectivity.

### IFP2410

A flexible 24-inch touch display that allows the teacher to face the class while annotating.

### myViewBoard®

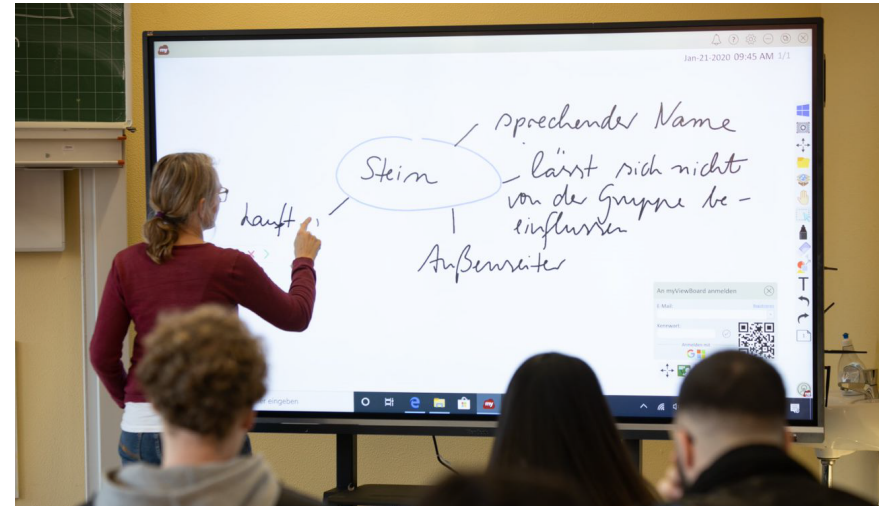

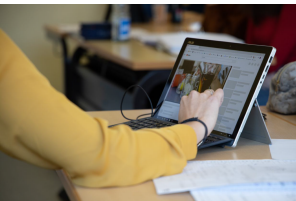

An intuitive, convenient software that enables interesting, multimedia-supported lessons.

# Results

Feedback from teachers was very positive across all subjects (including mathematics, German language, religion teachers, computer science).

In the beginning, there was often skepticism about adapting to a new technology. But as soon as the teachers had two or three lessons with the complete digital solution, they recognized the wide-ranging possibilities of advanced digital whiteboarding.

In particular, the teachers are pleased with the easy integration of online content, the time saved by using pre-designed whiteboards and sharing content digitally with students, and the good connectivity with their mobile devices.

## About ViewSonic

ViewSonic is a leading global provider of visual solutions. Known for its distinctive logo featuring three Lady Gouldian finches, ViewSonic's industry-leading products include monitors, projectors, digital signage, ViewBoard interactive displays, and myViewBoard software solution. ViewSonic has evolved from a device manufacturer to a visual solutions company by creating products, services, and sustainable ecosystems that greatly enhance visual engagement.
