About Akadimos (Greece)

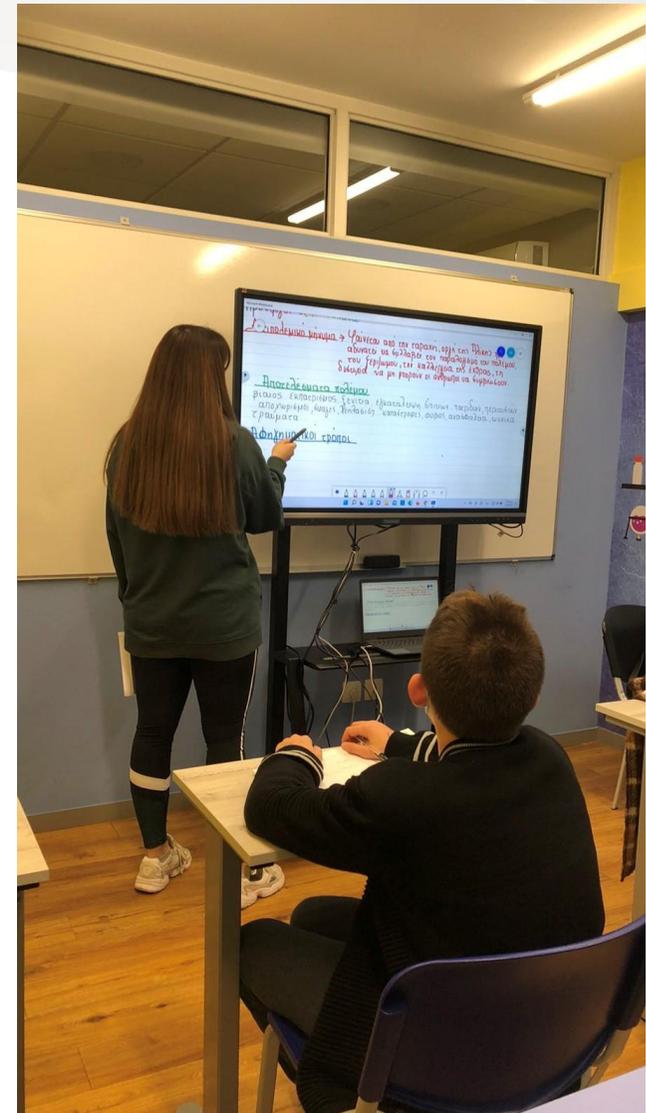

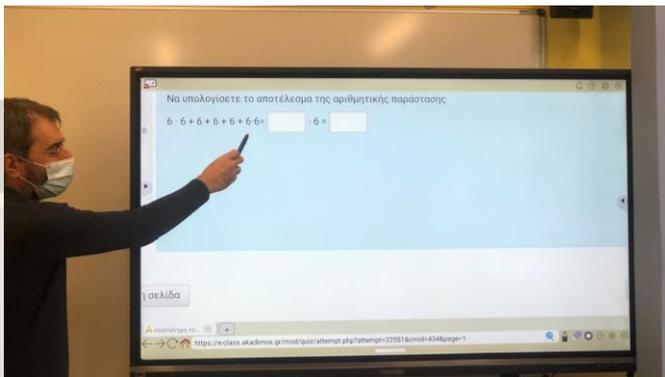

Located in the region of Athens, in Greece, Akadimos is an educational organization that celebrates 50 years of success and experience with duration, reliability, and respect for both parents and children. Akadimos specializes in preparing high school students for their national exams.

Challenge

The Covid-19 outbreak and its subsequent impact on the class attendance by both teachers and students profoundly challenged Akadimos, a private school based in Athens (Greece), to maintain the continuity of education. It quickly became clear that online teaching - as key part of embracing the hybrid classroom - was not as a temporary solution but rather a new teaching model. The implementation of hybrid learning was a crucial step to ensure that everyone could easily attend the lessons regardless of their location.

Akadimos has always been dedicated to paving a new way for innovative educational solutions. Driven by the willingness to provide the best services and support to the students, the institution has been always striving to lead the change in the whole region. Noticing the long-lasting shift that was happening in the didactic landscape, they took it as an opportunity to upgrade their teaching methods.

To address this challenge, Akadimos needed an interactive digital solution that could be used by teachers and students alike in both in-class and remote settings. It was crucial to have something easy to implement to respond quickly to the situation at hand while being robust and reliable for the years to come.

Solution

ViewSonic ViewBoards provided Akadimos teachers and students with advanced learning features and empowered the institution to become a leader of technological advancement in the region.

1. Interactive and Engaging Lessons

The ViewBoard interactive whiteboard along with the myViewBoard software suite allowed Akadimos to swiftly transition into the hybrid learning model at the peak of the Covid-19 pandemic and fully integrate it into the institution's curriculum. The variety of innovative tools drove engagement, attention, and knowledge retention while remaining intuitive and easy to use for the educators and administrative staff.

2. Hybrid Learning Made Easy

The myViewBoard software suite, used along with MS Teams, makes it possible for all students (both in-class or at home) to attend their lessons as if everyone was in the same classroom. The comprehensive file management features also help to easily share the lesson contents with all the students during and after the class.

ViewBoard IFP5550-3 55'' 4K

ViewSonic's Viewboards offer a robust digital whiteboarding experience that covers the full spectrum of visual solutions for the modern connected classroom.

myViewBoard Originals

High-quality premade interactive backgrounds, games, and lesson content on a variety of subjects. Find fun and engaging activities to do on your myViewBoard.

myViewBoard Whiteboard

Designed to enable collaboration and interaction for physical classrooms and hybrid learning. Stream to an unlimited number of participants while you teach your class live.

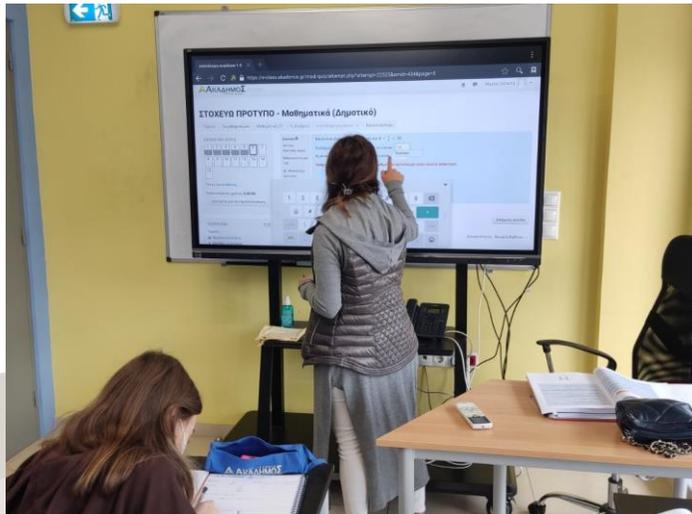

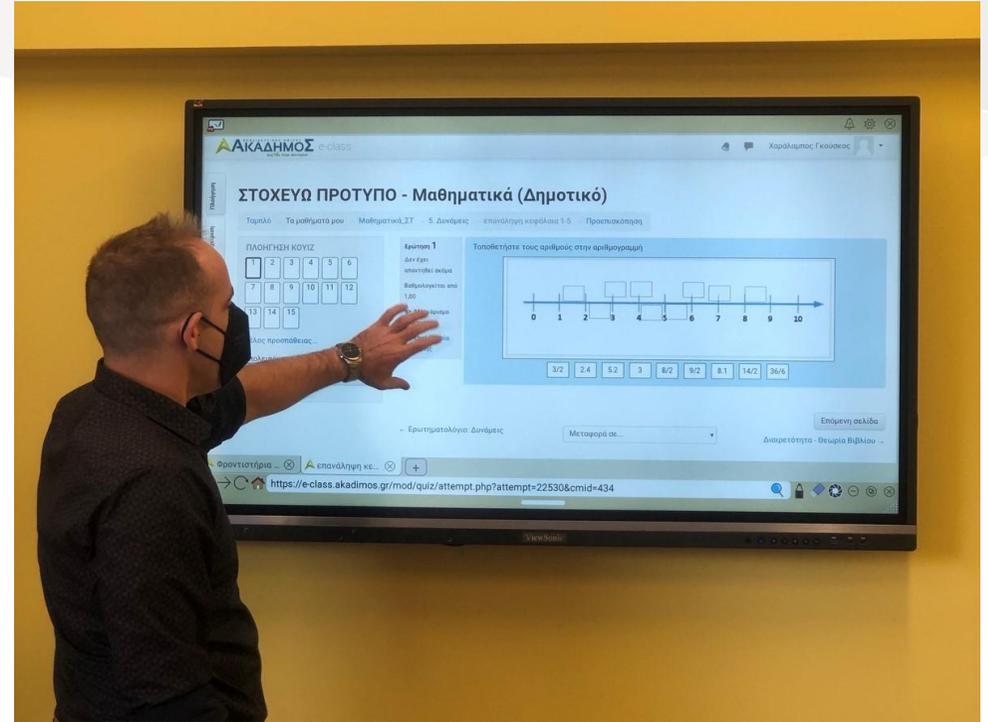

myViewBoard Companion

The perfect partner to your digital whiteboarding session, Companion enables quizzes, polls, file sharing, remote control, and other features right from your mobile device.

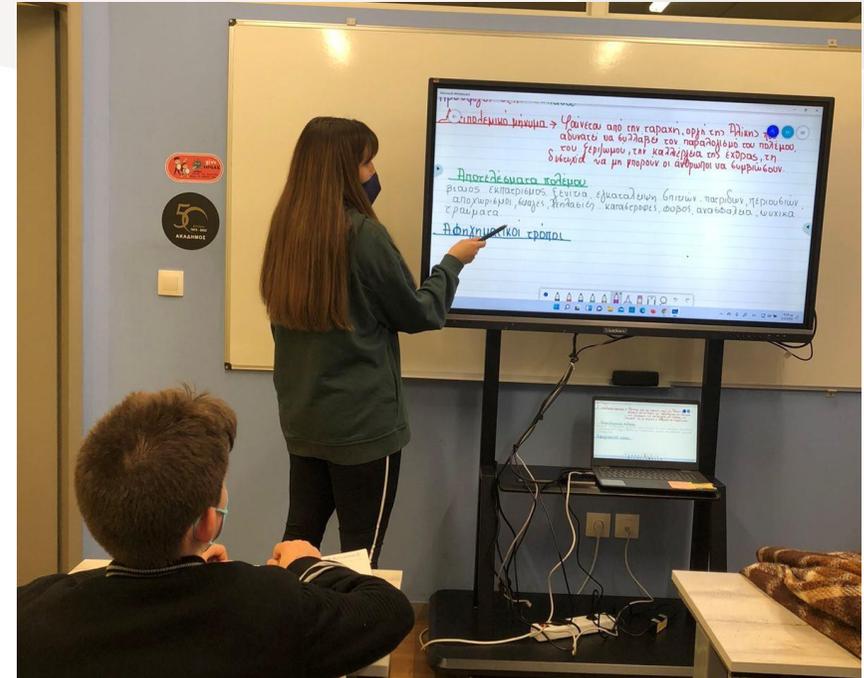

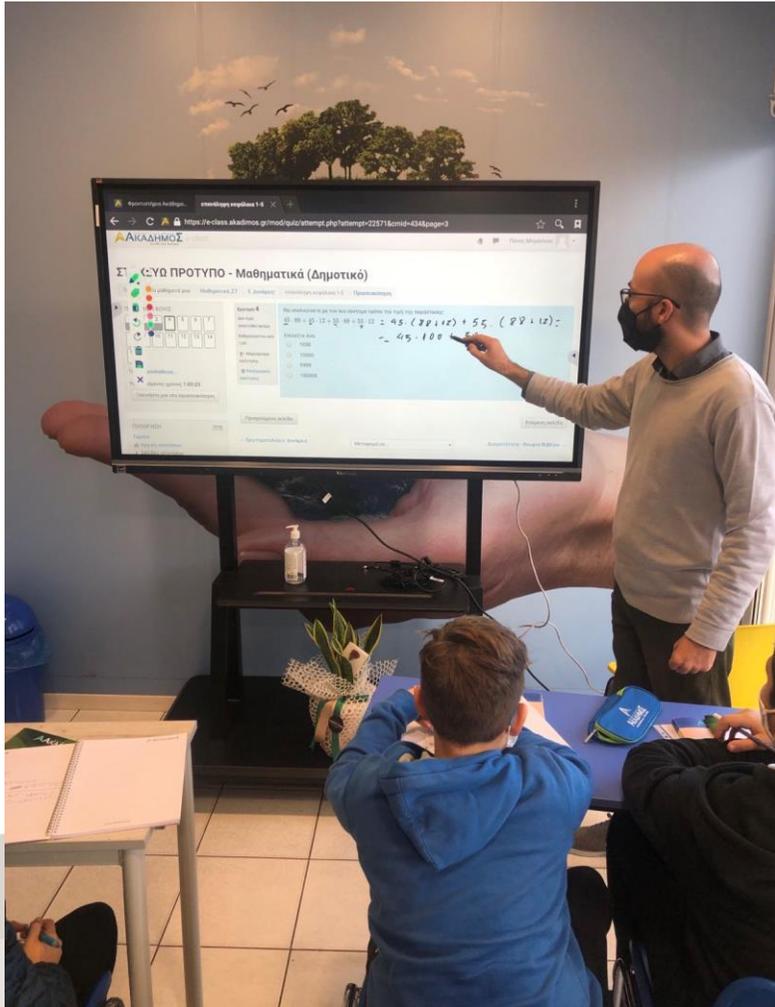

Results

The teachers were pleased with the implementation of the ViewBoards in their class, backed by the myViewBoard digital solutions. They felt empowered during the application of online teaching methods, and confident after the enactment of the hybrid learning model. The comprehensive set of both hardware and software features extended all the tools that teachers would normally use with special interactive and collaborative options.

Students welcomed the new solutions with great excitement and adopted them immediately. The enhanced interactivity and teamwork features boosted engagement during classes and raised participation levels during lessons. The implementation of the ViewBoards in the classroom extensively increased student performance and maximized the learning outcomes, especially for those who were facing difficulties with the traditional teaching methods.

Results

Following the successful implementation of the ViewBoards with the integrated myViewBoard suite, Akadimos has achieved its main goal of keeping the leader status among innovative educational organizations. Viewsonic solutions also helped to convince the teachers that a new era has come thus facilitating the comprehensive execution of hybrid learning structures. Once the teaching and administrative staff were fully on board with the most effective use of ViewBoards and myViewBoard software, they actively participated in the implementation process with great commitment.

About ViewSonic

ViewSonic has been an audio-visual leader worldwide for more than three decades. We firmly believe that we can partner with educators to achieve sustainable success and better learning outcomes.

Our considerable experience has taught us a great deal about the real-life challenges and needs of people we work with.

We are dedicated to shaping the future of the educational landscape by solving real problems. Through innovation, great products, and people orientated services, we promise to find the answers together.
