

# ViewSonic Manager

## Unlock Efficiency. Anywhere.

ViewSonic Manager is a comprehensive, user-friendly centralised Device Management System (DMS) designed for enterprises. This powerful, intuitive, web-based DMS streamlines internal communications and simplifies the management of ViewBoard displays and digital signage by enabling administrators to remotely control, maintain, and update devices. All myViewBoard Entity users receive complimentary access to Manager Standard, which offers essential device management and remote broadcasting features. Manager Advanced, available through a subscription, provides additional communication, management, and performance capabilities to maximise workplace efficiency.

## What Does Manager Do?

### Centralised Management

Organise ViewSonic displays into groups for efficient batch deployment of necessary applications, files, and settings configurations.

### Remote Access

Remotely control and update device firmware and software through a web-based dashboard for streamlined maintenance and optimised performance.

### Remote Broadcasting

Schedule and broadcast announcements, emergency alerts, and multimedia content throughout your workplace in a few simple clicks.
