

Exeat Weekend – a Tradition for Boarding Schools

An exeat grants a student leave of absence from a school, often for a weekend or short break, allowing them to return home or visit family. It is an official authorization for a student to be temporarily absent from a school, particularly a boarding school or university, or for a cleric to be absent from a church. Exeat weekends provide a special place our boarders have in our community. The term Exeat weekend provides a long weekend not only for our boarders but also for their families.

Modernizing Donor Recognition and Campus Storytelling with ViewSonic Customizable All-in-One LED Display

"In the years I've been working in the industry, I've never had a vendor modify an application just to help us. ViewSonic did that—they listened, fixed, and followed through."

— Callan Dixon, AV Technical Lead

Caulfield Grammar School

Location

Caulfield North, VIC, Australia

Education

Challenge

1. The traditional donor boards were **difficult to update** and failed to capture students' or visitors' attention.
2. The new building needed a high visibility display **viewable from multiple floors** without obstructing open spaces.
3. The installation site required a **durable, low-maintenance solution** for a high-traffic area near lifts and stairs.

Background

Caulfield Grammar School is a leading independent co-educational school in Melbourne recognized for academic excellence and whole-student development. Its new five-story Senior School Teaching and Learning Building embodies this philosophy, open, light-filled, and designed to inspire creativity, collaboration, and wellbeing.

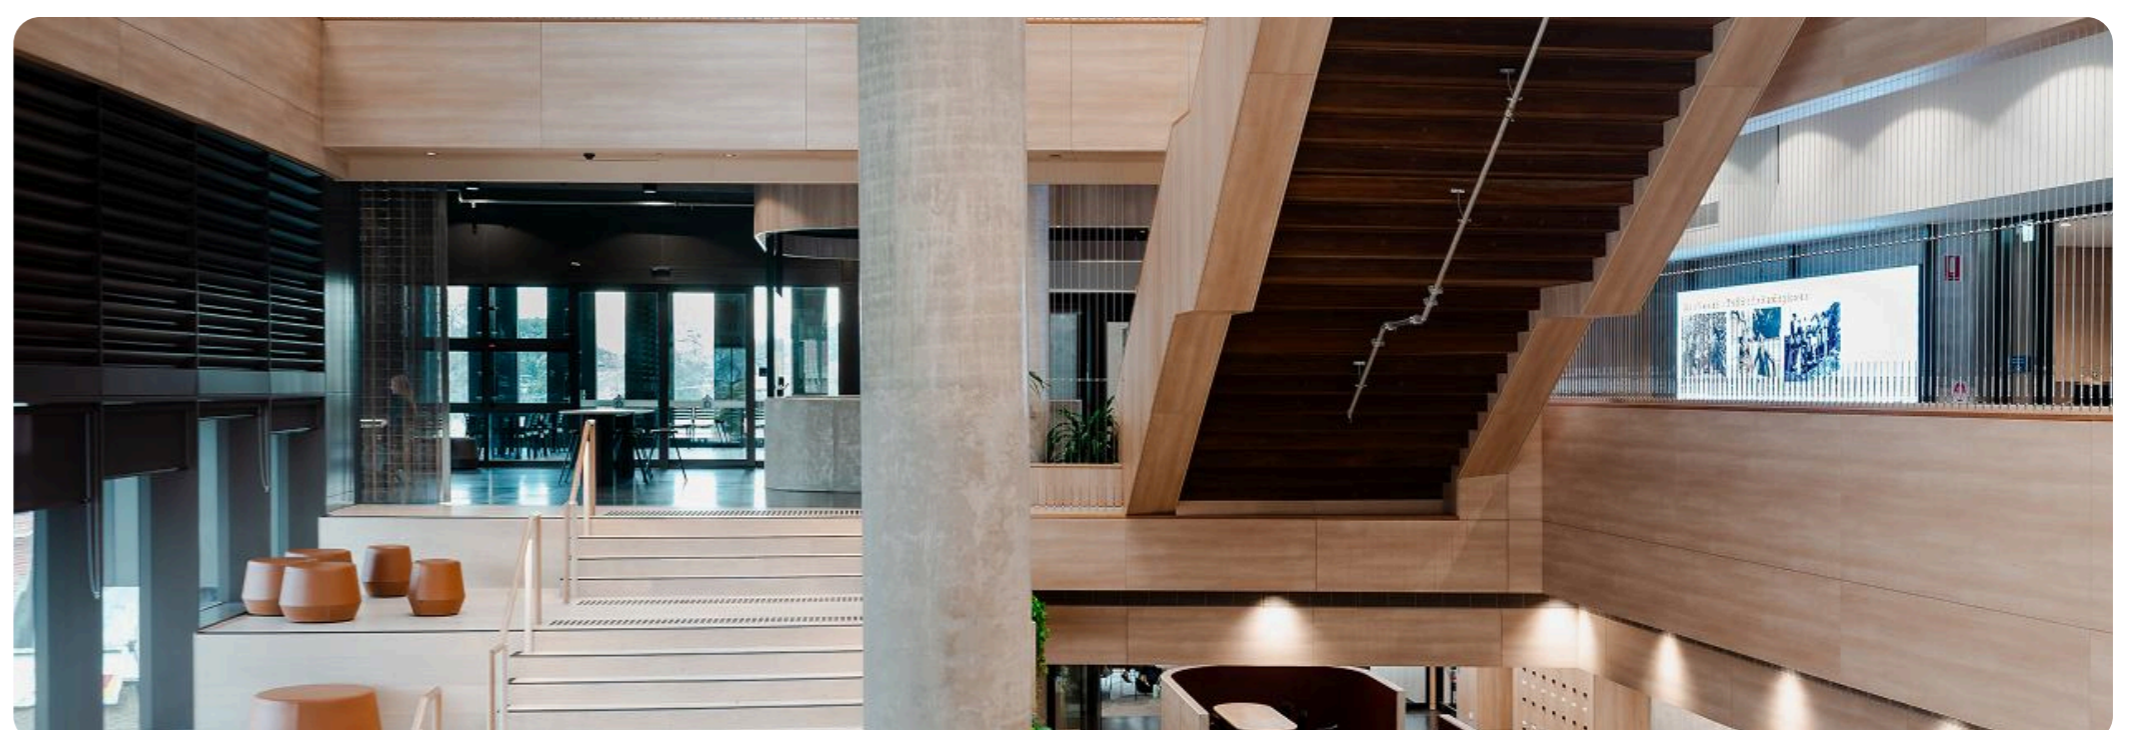

With a long-standing partnership built on innovation and reliability, Caulfield has integrated hundreds of ViewSonic ViewBoard® interactive displays and commercial displays across its campuses, all managed through the ViewSonic Manager platform.

The school set out to reimagine its traditional donor wall, transforming static plaques into a dynamic digital display that celebrates the school's community, history, and values in a more engaging way.

Challenge

Caulfield Grammar's former donor wall, made up of static plaques and glass display cabinets, was difficult to update, costly to maintain, and no longer engaging for today's students and visitors.

For its new Senior School Building, the team needed a bright, durable display that would stay visible in strong natural light and withstand constant foot traffic. With glass walls, open sightlines, and limited mounting space, the design called for a solution that complemented the architecture and helped bring the school's stories to life.

Modernizing Donor Recognition and Campus Storytelling with ViewSonic Customizable All-in-One LED Display

► Solution

1. Installed a **ViewSonic Customizable All-in-One LED display** (LDC031-180, 209”), ensuring bright, clear visibility across the atrium.
2. Centralized management with **ViewSonic Manager** across all campus displays.
3. Selected a **durable, front-serviceable, cable-free design** to suit the concrete wall location with high-foot traffic.

► Result

1. **Engaging, dynamic content** connects the school community and celebrates its heritage.
2. **Minimalist, robust installation** keeps spaces safe, open, and visually inviting.
3. **Real-time replacement:** swapping out modules with dead pixels through full-front maintenance, reducing waste and saving staff time.

Slim, lightweight design matching the school's architecture

Solution

To modernize donor recognition and campus storytelling, Caulfield Grammar partnered with ViewSonic to install a 209-inch All-in-One LED display (LDC031-180) as the centerpiece of its new building.

The LED's high brightness maintains clarity in naturally lit areas. Its All-in-One design integrates the power supply, control, image stitching, and display systems into a single unit, removing the need for extra wiring or separate components. This simplifies installation and helps preserve the building's clean design. Glue-on-Board surface protection guards against shocks, dust, and moisture. Mounted on a concrete wall, the system keeps a uniform look.

Pre-installed with ViewSonic Manager, the display integrates seamlessly with the school's existing signage system, already built around ViewSonic ViewBoard interactive displays and commercial displays. This allows staff to schedule content, monitor status, and update devices from one centralized platform.

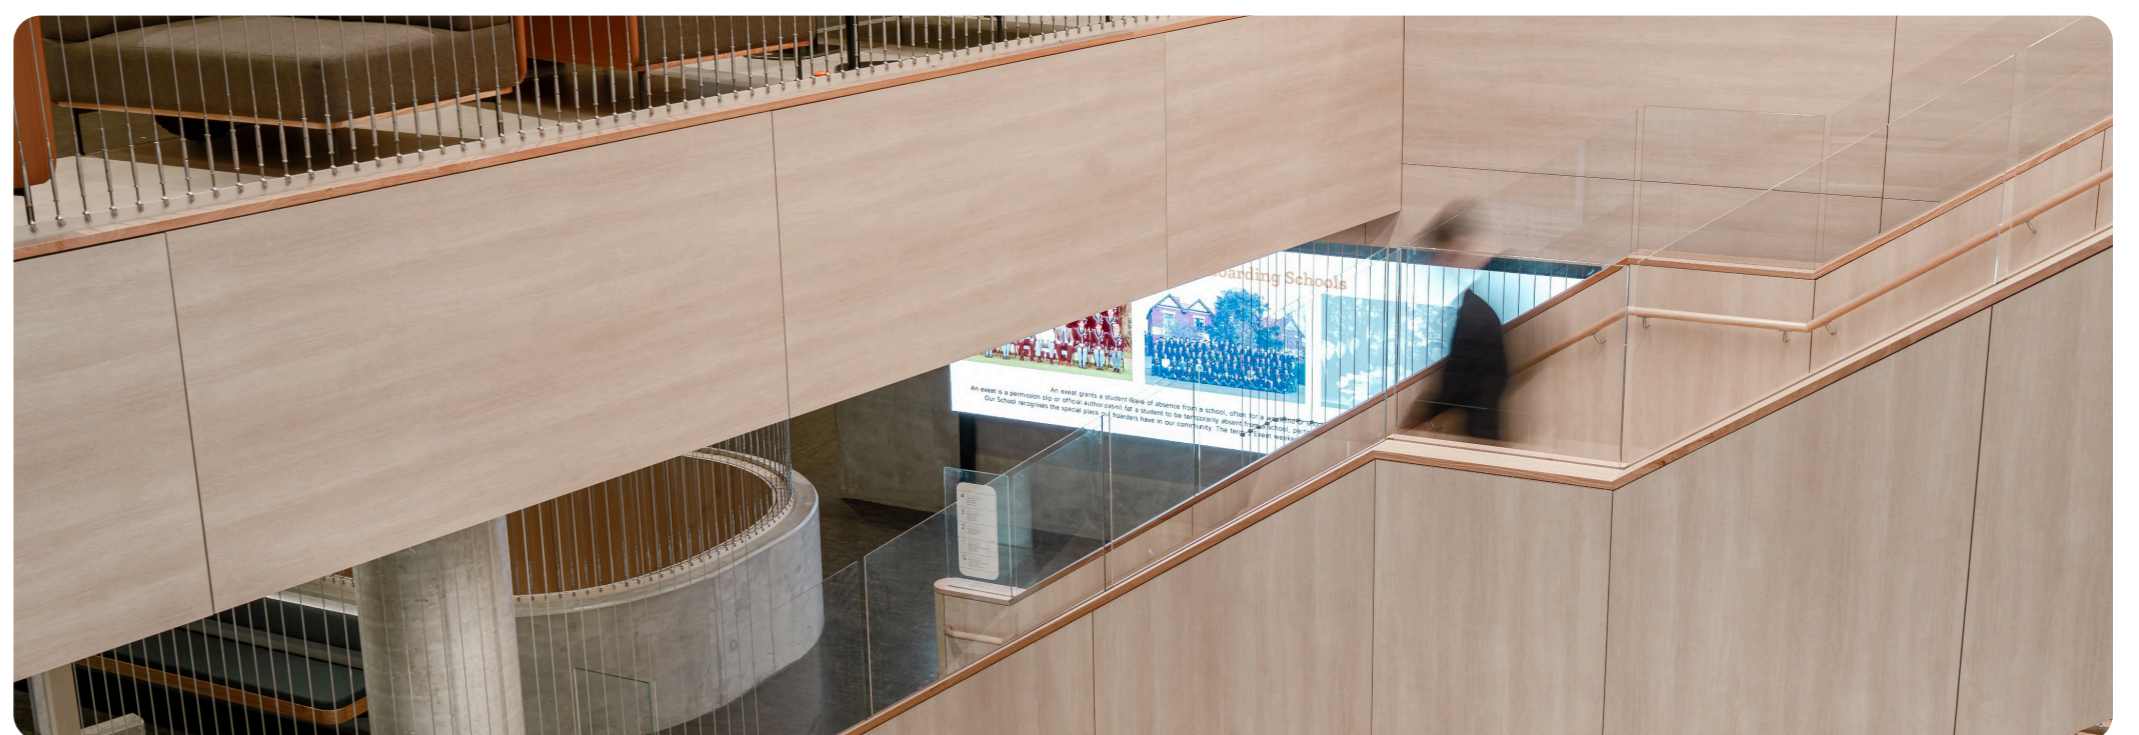

ViewSonic's local support during design and installation ensured a smooth rollout that met the school's timeline and technical needs. The detachable control box provides easy service access, and front-serviceable modules further reduce maintenance time.

Result

The new LED display has transformed how Caulfield Grammar School communicates its heritage, turning a static donor wall into a dynamic digital centerpiece used for announcements, wellness messages, and special events such as ANZAC Day and Giving Day. Delivering engaging content to thousands of students and visitors, it is monitored and updated remotely through myViewBoard Manager alongside other ViewSonic panels campus-wide, saving time and reducing maintenance.

Together, these capabilities show how ViewSonic solutions combine visual impact, reliability, and centralized control to enhance communication in modern educational environments.
