

# Streamline Workplace Device Management

## Challenge

Companies find it challenging and time-consuming to manage the many devices spread throughout their workplace. They must carry out manual maintenance, navigate complex device management systems, and address compatibility issues among devices from various manufacturers. Additionally, effective office communication often relies on separate software tools and requires on-site staff for setup. These challenges make it difficult for companies to maintain a seamless and efficient working environment.

## Solution

ViewSonic Manager is a user-friendly centralised device management solution that simplifies the management of office devices by providing comprehensive control over ViewSonic ViewBoards, presentation displays, and any devices paired with the ViewBoard Box. With its remote device control, monitoring, optimisation, energy conservation, and broadcasting features, it streamlines the responsibilities of IT administrators to ensure seamless device operation across work environments.

ViewSonic Manager is an intuitive web dashboard tailor-made for managing your network's ViewSonic devices, offering centralized device control, monitoring, and enhanced security. Upgrade to Manager Advanced for extended features, including task automation, file transfer, backup saves, and remote broadcasting.

## Effortless Management of ViewSonic Hardware

### ViewBoards

Interactive display for enhancing team collaboration.

### Presentation Displays

Digital signage designed for events and workplace communication.

### All-in-One LED Displays

Enjoy larger-than-life images with hassle-free setup and installation.

### The ViewBoard Box

Transform any display into a myViewBoard integrated digital podium.
