Introducing the New myViewBoard

Say hello to a smarter, more intuitive whiteboarding experience. Whether you're getting the new interface through an automatic update or exploring the upgrade on your own, this release is more than a visual refresh—it's about giving you greater control, streamlining your workflow, and supporting every kind of learner in your classroom.

More intuitive interface

Navigate with ease thanks to a refreshed layout that puts your go-to tools front and centre—so you can stay focused on teaching, not finding buttons.

Streamlined Multitasking

Open and toggle between multiple whiteboards within a single session. The new tabbed layout makes it easy to organise content, manage activities, and switch lessons on the fly.

Enhanced Participation

Put student engagement at the heart of every lesson with accessibility features like Immersive Reader, speech-to-text, and live captions—and the upgraded Participate Mode.

The Magic Box, Reinvented

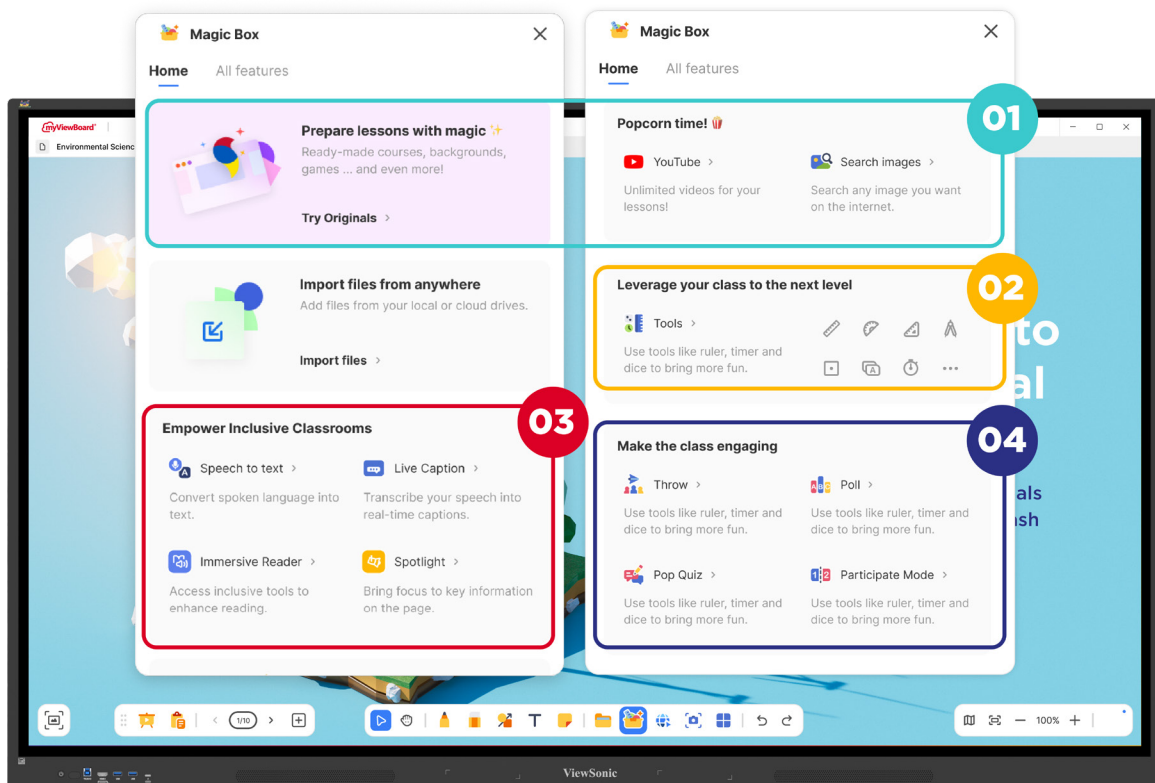

The Magic Box has been redesigned to help you find what you need—fast. The Home tab organises tools into scrollable sections with clear descriptions, while the All Features tab gives you a full overview when you need to explore more.

01 Multimedia Import

Use existing lessons and whiteboard files, add ViewSonic Originals, import files, and insert YouTube videos or images—all without leaving the app.

02 Stationary & Widgets

Access rulers, protractors, 3D shapes, math tools, and other interactive elements that help you visually support key concepts with clarity and accuracy.

03 Accessibility Features

Support all learners with built-in features like Immersive Reader, live captions, and text-to-speech—ready to use with no extra setup.

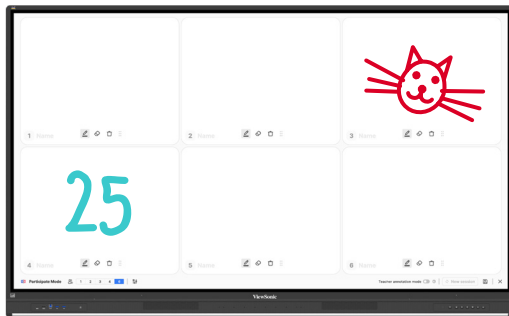

04 Engagement Tools

Receive student content with Throw, create flashcards, launch live polls, run pop quizzes, and split the canvas into sections with Participate Mode.

Discover the New Participate Mode

Get ready to level up your lessons with the reimagined Participate Mode in the upgraded myViewBoard. From personalised learning spaces to intuitive feedback overlays, it's packed with features that make your teaching more flexible, your activities more engaging, and your grading less of a chore.

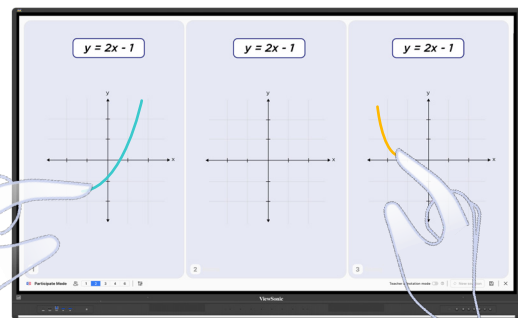

Switch It Up Instantly

Jump from the fullscreen infinite canvas to smaller, split boards with just a tap—perfect for group work, breakout sessions, or just switching gears mid-lesson.

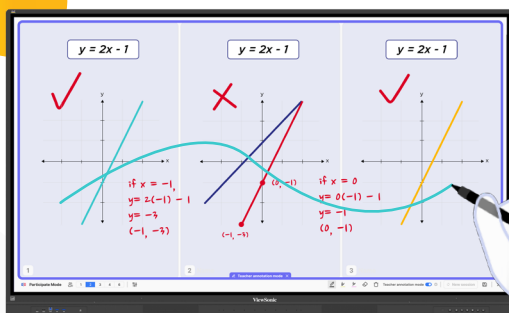

Create the Right Space

Apply a handwriting sheet, lined spelling grid, or activity template—you name it—as the background in seconds. Then simply split the screen so each student gets their own space to write, trace, or draw on the big screen, all at once.

Grade on the Go

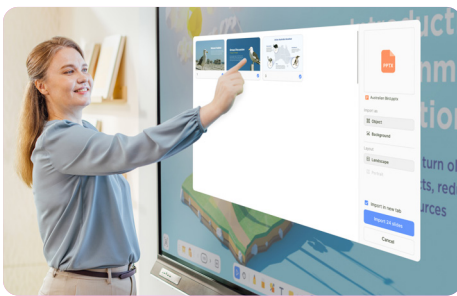

Activate annotation overlays to grade directly on student submissions, jot down quick notes, and save feedback—all without switching tools or breaking your rhythm. It's quick, tidy, and built to match the way you actually teach.

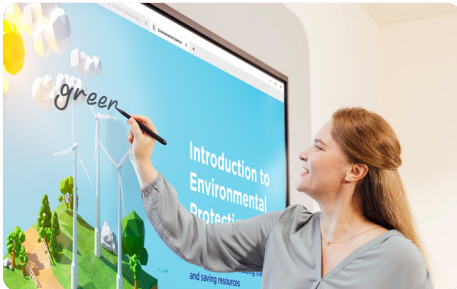

What's New & Improved

Beyond the fresh coat of paint, the myViewBoard update makes teaching smoother, faster, and more flexible with a range of enhanced features. From upgraded file handling to easier multitasking and inclusive participation tools, here's what's new and ready to explore:

Bring More File Types to the Board

Easily upgrade your existing lesson content in myViewBoard with support for IWB, Flipchart, ENB, Notebook, and common file formats like Google Slides, PDF, PPT, DOC, and JPG—so you don't need to juggle multiple apps.

Create Across Multiple Tabs

Open up to 20 whiteboards at once with the new tabbed layout—perfect for prepping multiple lessons, reviewing different class periods, or running comparisons without breaking your flow.

Engage Students with Participate Mode

Split the canvas into individual boards, apply ViewSonic Originals or Irlen filter backgrounds, annotate and grade student work, and save it locally or to the cloud for easy tracking and sharing—all with the new Participate Mode.

What Happens Next

Upgrading to the new myViewBoard interface is designed to be simple—and worth it. You'll gain access to a faster layout, smarter tools, and features built to support every type of learner. Whether the update arrives automatically or you're choosing to upgrade manually, here's what to expect based on your device:

Windows Users

The upgraded myViewBoard is a separate app launching July 2025, with an MSI installer also available. To get started:

Step 1: Download

Go to myViewBoard.com/download/ or click Download in the myViewBoard.com homepage header. Select Download for Windows (64-bit).

Step 2: Install

Open the file and follow the installer instructions.

Step 3: Sign In

Launch the app and sign in to access all features.

Note: The legacy myViewBoard will remain available until summer 2026.

Android ViewBoard Users

The upgraded myViewBoard will roll out via an over-the-air (OTA) update on compatible ViewBoards starting July 2025.

Step 1: Launch myViewBoard

Open the app on your ViewBoard.

Step 2: Update

Tap Yes when prompted to update and accept terms the terms.

Step 3: Sign In

Launch the app and sign in to access all features.

Mobile & Tablet Users

If automatic updates are enabled, the new interface will appear automatically. If not, you can easily update the app manually through the Apple App Store or Google Play Store.
